

NICKY

CREATE

**Stansbury Concept:** I have been a mural artist for the past 5 years, but in that short amount of time I have completed over 30 murals for personal projects, schools and businesses, some include DPTI, Red Bull, St Ignatius School and Mitre Ten.

I am excited to potentially work with the Yorke Peninsula community to create an awe inspiring and breathtaking mural on the Stansbury Water Tower. This mural would increase tourist interest and create a beautiful artistic landmark for the community and South Australia. I have a large following on social media with people often traveling to Kadina and Moonta just to see my murals, so I wouldn't be surprised if something this scale draws a lot of attention and publicity in Adelaide.

I would want to create a work of art that reflects the daily lives of the people who live locally, what they love about their surroundings, reflecting on the gorgeous beaches along the coast and native ocean wildlife. For Stansbury I have created a draft concept that incorporates the main themes discussed in the project scope, for the background a gorgeous deep blue fading the green background covering the entire structure, so you hardly know what it was. Then beautiful glassy waves at the lower and upper sections, within the waves dolphins swimming, a blue crab sneaking out the wave moving towards the mother of pearl/oyster shell and a few emitransparent reeds/seaweed through the mural wrapping around.

I want to create a mural that is not only bright and aesthetically pleasing but a piece of art that is inclusive, enriches the lives of the locals and tourists who visit and gives a positive cultural experience giving the local community meaning and affiliation to their surroundings.

## Stansbury Design Concept:

(to scale/flat. Red and yellow safety zones are not included in concept design)
