## SITE DESCRIPTIONS AND RECOMMENDATIONS

### SECTION 1 - HICKEYS POINT TO CORNY POINT

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### 5.1 Hickeys Drive

<b>Site Description</b>	Hickeys Drive is the coastal strip located on the east coast, between Port Giles and Coobowie.	
<b>Recreational activities</b>	Fishing, Walk the Yorke (WTY), boat launch, day visit area	
<b>Existing infrastructure</b>	<ul style="list-style-type: none"> <li>• Gravel path</li> <li>• 'Your rubbish is yours' sign</li> <li>• Camping prohibited sign</li> <li>• WTY 'Restoring the balance' sign</li> <li>• WTY 'Saving our rocky reefs' sign</li> <li>• Bench seat x 2</li> </ul>	<ul style="list-style-type: none"> <li>• WTY shelter with picnic table and water tank</li> <li>• Boat ramp</li> <li>• 'Recreational fishing' sign</li> <li>• 'Coobowie Aquatic Reserve' sign</li> <li>• 'No dumping of rubbish' sign</li> <li>• Gravel vehicle track</li> </ul>
<b>Threats</b>	Illegal dumping, camping, vehicle use, weeds, unauthorised removal of vegetation, pest animals, non- vehicle access, loss of Narungga cultural heritage	
<b>Community Land Management Category</b>	Crown Licence	
<b>Landform</b>	Low clifftop Sand dune	
<b>Native vegetation type</b>	1. Coastal Shrubland 2. Sedgeland	
<b>Native vegetation condition</b>	BushRat Score : North 53.20 (medium) South 55.17 (medium - high)	
<b>Dominant flora</b>	1. Hakea Wattle ( <i>Acacia hakeoides</i> ), Common Boobialla ( <i>Myoporum insulare</i> ), Nitre Bush ( <i>Nitraria billardierei</i> ), Sea Box ( <i>Alyxia buxifolia</i> ), Coast Saltbush ( <i>Atriplex cinerea</i> ), Sea-berry Saltbush ( <i>Rhagodia candolleana</i> ) 2. Black Grass Saw-sedge ( <i>Gahnia lanigera</i> ), Short-stem Flax-lily ( <i>Dianella brevicaulis</i> ), Sword-sedge ( <i>Lepidosperma congestum</i> ), Scented Mat-rush ( <i>Lomandra effusa</i> )	

<b>Weeds</b>	<p><b>HIGH PRIORITY</b></p> <p><b>Bridal Creeper (<i>Asparagus asparagoides</i>)</b> Present at northern end, check for rust fungus and introduce if required.</p> <p><b>Western Coastal Wattle (<i>Acacia cyclops</i>)</b> Start working from the north where it is less prevalent and native vegetation is of higher quality.</p> <p><b>*African Boxthorn (<i>Lycium ferocissimum</i>)</b> Low numbers. To be removed with <b><i>Acacia cyclops</i></b>.</p> <p><b>*Gazania (<i>Gazania sp.</i>)</b> Present at southern end near houses.</p> <p><b>Golden Pallensis (<i>Asteriscus spinosus</i>)</b> Highly invasive daisy, present in northern half of reserve.</p> <p><b>LOW PRIORITY (MONITOR)</b></p> <p>Golden Wreath Wattle, Marram Grass (foredunes), Evening Primrose, Radiata Pine, Golden Aeonium, Red Hot Poker, Onion Weed, annual grasses, Long-fruited Turnip, Brome Grass, False Sow-thistle, Bamboo, Pincushion, Wards Weed, Wild Turnip, Black Nightshade</p> <p>*False Caper (<i>Euphorbia terracina</i>) sparse at southern end.</p> <p>Introduced Eucalyptus species to be replaced with locally native species when they die.</p>
<b>Conservation and cultural significance</b>	<ul style="list-style-type: none"> <li>Coastal Action Plan Cell 37 and 38. Considered lowest conservation priority with highest threat, based on coastal cell conservation analysis (Caton et al. 2007)</li> <li>The following listed fauna have been recorded along this section of coast: Ruddy Turnstone (SA:R), Curlew Sandpiper (AUS:CR), Grey-tailed Tattler (SA:R), Great Knot (AUS:CR, SA:R), Bar-tailed Godwit (SA:R), Pacific Golden Plover (SA:R), Fairy Tern (AUS:VU, SA:E, YP:EN)</li> </ul>
<b>Active community groups and projects</b>	No current projects.
<b>Summary of Site Recommendations</b>	<p>This area is highly modified. Weed density is high across the majority of this reserve. There are large areas of planted introduced Eucalypt species. The northern section (approximately 200 metres south of the Port Giles' silos) is in good condition with high native species diversity and few weeds. The area south of the boat launch and day visit area has a high percentage of introduced species as does the area directly south of the Port Giles' silos.</p> <ul style="list-style-type: none"> <li>Lockable bollards at the three entrances to vehicle track, allowing Council/contractor access only</li> <li>Close small western track, directly north of WTY shelter and revegetate</li> <li>Remove building materials dumped at northern end of boat launch and day visit area</li> <li>Commence weed removal at northern end from high quality vegetation and work out, to the north and south. As weed density gets higher follow up revegetation will be required. Weed removal in these areas will need to occur in small sections to reduce the risk of erosion, and follow up removal of <i>Acacia Cyclops</i> seedlings will be required</li> </ul>

**Hickeys Drive - Day Visit Area:  
Proposed Works****Legend**

-  Close track
-  Lockable bollard
-  Remove dumped building materials
-  Revegetate closed track

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### 5.2 Coobowie

<b>Site Description</b>	<p>The town of Coobowie is situated 15 kilometres southeast of Yorketown.</p> <p>This plan covers the area from the pedestrian entrance of the Edithburgh- Coobowie walking trail, just south of 6348 St Vincent Highway (approximately halfway between Coobowie and Edithburgh), to the eastern end of the township. It includes the Coobowie Aquatic Reserve.</p>	
<b>Recreational activities</b>	Fishing, boating, Walk the Yorke (WTY), bird watching, swimming, holiday destination.	
<b>Existing infrastructure</b>	<p><b>Edithburgh – Coobowie walking trail (Area A)</b></p> <ul style="list-style-type: none"> <li>• Bitumen and gravel path</li> <li>• WTY 'Weeds and biodiversity' sign</li> <li>• 'No cars or motorcycles' signs</li> <li>• 'Camping Prohibited' sign</li> <li>• 'Bicycle and pedestrian path' sign</li> </ul> <p><b>Coobowie Estuary (Area B and C)</b></p> <ul style="list-style-type: none"> <li>• 'No motorbikes' sign x 2</li> <li>• 'A coastal wetland of national significance' sign</li> <li>• 'For bush birds too' sign</li> <li>• 'Shorebird heaven' sign</li> <li>• 'Coobowie bird hide' sign</li> <li>• WTY 'Coobowie Inlet Sanctuary Zone' sign</li> <li>• WTY 'Gadli Creation' sign</li> <li>• 'Coobowie causeway' sign</li> <li>• 'Walking trail continues over road' sign</li> <li>• 'No cars or motorcycle' signs x 2</li> <li>• 'Bicycle and pedestrian shared path' sign x 2</li> </ul>	<ul style="list-style-type: none"> <li>• 'Fishing from causeway prohibited' sign x 5</li> <li>• 'No fishing in all waters of salt swamp creek' sign</li> <li>• Bird hide</li> <li>• 'Shorebirds of Coobowie' interpretive signs (in bird hide)</li> <li>• Concrete picnic table x 2</li> <li>• Concrete bench seat</li> <li>• Metal bench seat</li> <li>• Formalised gravel path</li> <li>• Formalised gravel car park at bird hide</li> </ul> <p><b>Coobowie Township (Area D)</b></p> <ul style="list-style-type: none"> <li>• Beach shelter</li> <li>• 'Coobowie Aquatic Reserve' sign</li> <li>• 'Fishing Closure' signs</li> <li>• 'Help protect SA's oyster industry' sign</li> <li>• 'Recreational Fishing Gulf St Vincent' sign</li> <li>• Informal paths to beach at eastern end of town</li> <li>• Memorial bench seat</li> </ul>
	<p>These areas are under other management categories and will not be included in this Strategy unless they impact coastal reserves:</p> <ul style="list-style-type: none"> <li>• Playground, toilets and barbeque area (managed by Assets and Infrastructure Services)</li> </ul>	

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

<b>Threats</b>	Illegal dumping, weeds (including garden escapes), unauthorised removal of vegetation, pest animals, non-vehicle access, loss of Narungga cultural heritage
<b>Community Land Management Category</b>	5757/196 - Community Reserve (north end of Beach Road) All other properties - Crown Licence
<b>Landform</b>	Coastal wetland Cliff
<b>Native vegetation type</b>	Salt Marsh and Samphire Coastal Shrubland
<b>Native vegetation condition</b>	BushRAT score: 35.36 (medium)
<b>Dominant flora</b>	Drooping Sheoak ( <i>Allocasuarina verticillata</i> ), Sticky Hop-bush ( <i>Dodonaea viscosa ssp. spatulata</i> ), Short-stem Flax-lily ( <i>Dianella brevicaulis</i> ), Sea-berry Saltbush ( <i>Rhagodia candolleana</i> ), Nitre Bush ( <i>Nitraria billardierei</i> ), Coast Daisy-bush ( <i>Olearia axillaris</i> )
<b>Weeds</b>	<p><b>HIGH PRIORITY</b></p> <p><b>Western Coastal Wattle (<i>Acacia cyclops</i>)</b> Heavy infestation along Edithburgh to Coobowie walking trail and at the Coobowie Estuary. Removal along the trail should be undertaken in stages in winter months over several years to minimise erosion (1-2 days of cut and remove per annum). Follow up with planting 50-100 tubestock each year along with ongoing seedling removal. Increasing species diversity and local native species density is the focus as total eradication is unlikely. The level of community involvement to monitor and remove seedlings in restoration areas will determine the potential area of revegetation. In Area B removal should be coordinated in sections, along with the Aleppo Pines (1-2 days per year).</p> <p><b>*African Boxthorn (<i>Lycium ferocissim</i>)</b> Small number of plants amongst coastal vegetation. To be removed when <i>Acacia cyclops</i> removal occurs.</p> <p><b>*Aleppo Pine (<i>Pinus halepensis</i>)</b> To be removed as other woody weed removal occurs. Heavy infestation south of the estuary, particularly Area B. Removal to be undertaken in small sections.</p>

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

	<p><b>Century Plant (<i>Agave Americana</i>)</b> Several individual plants northeast of estuary. Large plants in the Sand Quarry have produced a large number of small pups. These should be removed as a priority before they establish further. Mechanical removal is most effective.</p> <p><b>*Gazania (<i>Gazania sp.</i>)</b> Present on southern side of estuary and at the eastern end of town in Area D.</p> <p><b>*Prickly Pear (<i>Opuntia stricta</i>)</b> Single plant on reserve in front of houses at Hickeys Drive.</p> <p><b>*Bridal Creeper (<i>Asparagus asparagoides</i>)</b> Present south of estuary and along walking trail (Area A). Check for presence of rust fungus and introduce if required.</p> <p><b>Golden Pallensis (<i>Asteriscus spinosus</i>)</b> Highly invasive. Present along walking trail and Sand Quarry.</p> <p><b>LOW PRIORITY (MONITOR)</b></p> <p>Golden Wreath Wattle, Yukka (single plant along path from bird hide), Sea Lavender, *False Caper (scattered throughout area in low density), Annual grasses, Pincushion, Radiata Pine, Introduced succulents</p>
<b>Conservation and cultural significance</b>	<ul style="list-style-type: none"> <li>Coastal Action Plan Cell 49. Considered least conservation priority based on coastal cell conservation analysis (Caton et al. 2007)</li> <li>The Coobowie Aquatic Reserve is an important fish nursery. It is also home to several migratory shorebird species</li> </ul>
<b>Active community groups and projects</b>	Coobowie Progress Association
<b>Summary of Site Recommendations</b>	<p><b>Edithburgh – Coobowie walking trail</b></p> <p>This area is highly modified. There is no benefit in removing the established, non-invasive, introduced trees but they should be replaced with locally native species when they die. Weed removal and revegetation is required along the Edithburgh to Coobowie walking trail and should be undertaken in stages, focussing on project areas. The amount of revegetation undertaken per year is dependent on the community capacity to assist with monitoring and the removal of seedlings of weed species in revegetation areas.</p> <ul style="list-style-type: none"> <li>Stage 1: Rehabilitate larger areas of introduced grasses starting with weed control followed by revegetation to increase density of native species (150 - 200 tubestock)</li> <li>Stage 2: Small patches of woody weed removal followed by revegetation and ongoing seedling removal. Only small areas of woody weeds to be removed at any time to avoid erosion (50-100 tubestock per annum)</li> </ul> <p><b>Coobowie Estuary</b></p> <p>This area is highly modified with a high density of Western Coastal Wattle and Aleppo Pine.</p>

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### Coobowie Township

- Extensive weed removal (some woody weed removal has already occurred)
- Build up Sand Quarry area with clean fill
- Once weeds are removed, rehabilitate the Sand Quarry with an interpretive plant identification trail and low-growing locally native shrubs and sedges (200 tubestock)
- Install 'No dumping' sign
- Coastal gardens handbook to be distributed to households to inform home owners about potential invasive plant species and recommended indigenous alternatives
- Monitor paths to the beach and revegetate those that are at risk of sand dune drift. Reduce number of paths to the beach, particularly at far eastern end to approximately one every three houses
- Monitor formal beach access infrastructure

*Bridal Veil along walking trail*

*Century Plant at Sand Quarry*

*Rubble at Sand Quarry*

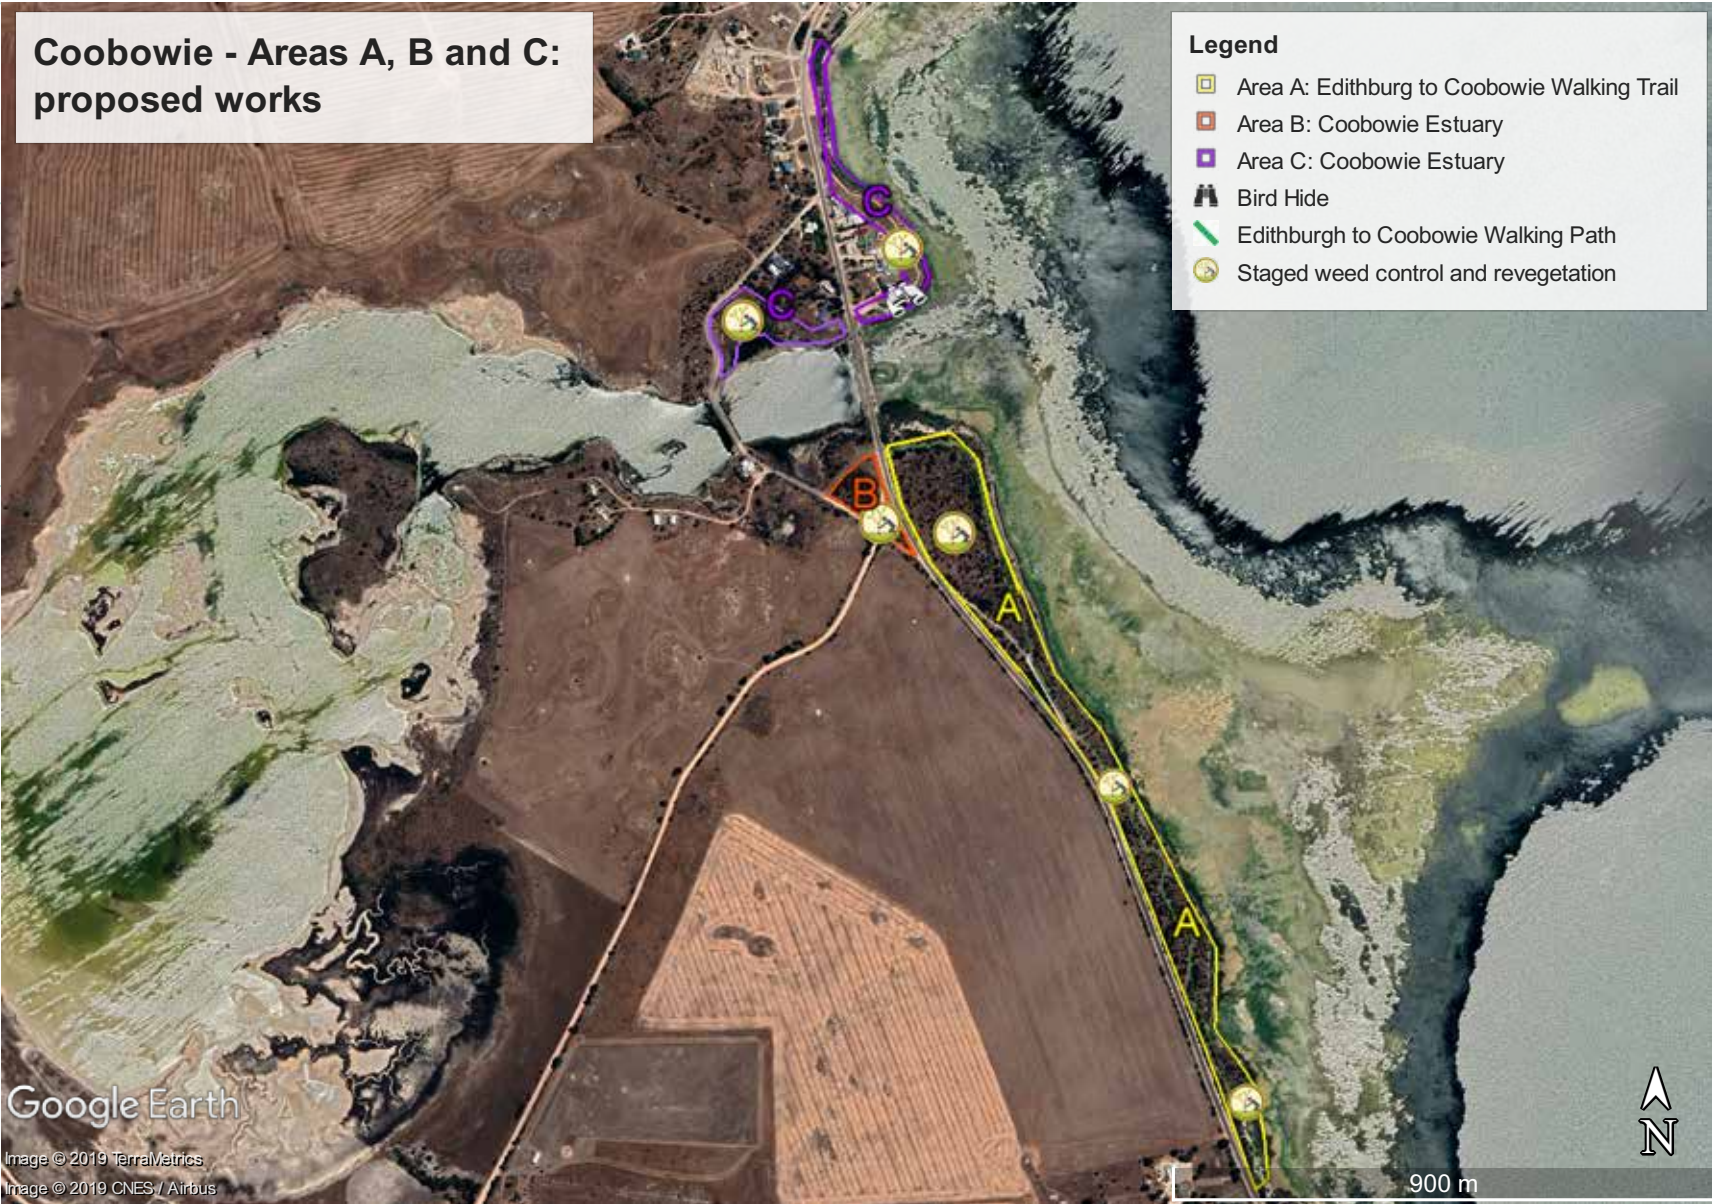

*Stage 1 revegetation area*

## SITE DESCRIPTIONS AND RECOMMENDATIONS

**Coobowie Township - Area D:  
proposed works**

## 5.3 Edithburgh

<b>Site Description</b>	<p>Edithburgh is a small coastal town located on the southeastern corner of the Yorke Peninsula, accessed via St Vincent Highway. It is a popular tourist destination.</p> <p>This plan covers from South Terrace in the Edithburgh township to the pedestrian entrance of the walking trail, just south of 6348 St Vincent Highway (approximately halfway between Coobowie and Edithburgh).</p>	
<b>Recreational activities</b>	Fishing, Walk the Yorke (WTY), swimming, diving, snorkelling, natural environment.	
<b>Existing infrastructure</b>	<ul style="list-style-type: none"> <li>• Shelter x 3, opposite Henry Street, Edith Street and Cross Street</li> <li>• Picnic table opposite Thomas Street</li> <li>• Bitumen and gravel walking path</li> <li>• 8 benches (from pool boundary to boat ramp)</li> <li>• 'Bicycle and walking shared path' sign</li> <li>• WTY 'Golf Course caution' sign</li> <li>• WTY 'Edithburgh to Port Moorowie' sign</li> <li>• 'Castle Salt' sign</li> <li>• 'Horses and Dragons Under the Jetty' sign</li> <li>• 'Edithburgh-Sultana Point' sign</li> <li>• Exercise equipment</li> <li>• 'Camping prohibited' signs (at walking trail access points)</li> <li>• 'No cars or motorcycles' signs (at walking trail access points)</li> </ul>	<p>Interpretive signage in coastal areas under other management categories:</p> <ul style="list-style-type: none"> <li>• WTY 'Edithburgh Cemetery- Nharrangga ancestors' sign</li> <li>• WTY 'Edithburgh Jetty Truck' sign</li> <li>• WTY 'Edithburgh Tidal swimming pool' sign</li> </ul> <p>These areas are under other management categories and will not be included in this strategy unless they impact coastal reserves:</p> <ul style="list-style-type: none"> <li>• Jetty area (managed by Assets and Infrastructure Services)</li> <li>• Edithburgh Tidal Pool (ETP) (managed under the ETP Working Group)</li> <li>• Grassed areas (managed by Assets and Infrastructure Services)</li> <li>• Golf Course (managed by lessee)</li> <li>• Cemetery (managed by Development Services)</li> <li>• Boat Ramp (managed by Assets and Infrastructure Services)</li> </ul>
<b>Threats</b>	Illegal dumping, vehicle use, weeds (including garden escapes), unauthorised removal of vegetation, pest animals, non-vehicle access, loss of Narungga cultural heritage	
<b>Community Land Management Category</b>	Crown Licence	
<b>Landform</b>	Cliff top	

<b>Native vegetation type</b>	Coastal Shrubland
<b>Native vegetation condition</b>	BushRAT score: 41.44 (medium)
<b>Dominant flora</b>	Drooping Sheoak ( <i>Allocasuarina verticillata</i> ), Nitre Bush ( <i>Nitraria billardierei</i> ), Sea Box ( <i>Alyxia buxifolia</i> ), Coast Daisy-bush ( <i>Olearia axillaris</i> ), Common Boobialla ( <i>Myoporum insulare</i> ), Coast Wallowa ( <i>Acacia nematophylla</i> ), Grey Mulga-bush ( <i>Acacia brachybotrya</i> ), Ruby Saltbush ( <i>Enchylaena tomentosa</i> ), Short-stem Flax-lily ( <i>Dianella brevicaulis</i> ), Spear Grass ( <i>Austrostipa</i> sp.) Wallaby Grass ( <i>Austrodantonia</i> sp.)
<b>Weeds</b>	<p><b>HIGH PRIORITY</b></p> <p><b>Western Coastal Wattle (<i>Acacia cyclops</i>)</b> Heavy infestation along entire Edithburgh to Coobowie walking trail. Removal should be undertaken in stages in winter months over several years to minimise erosion (1-2 days of cut and remove per annum). Follow up with planting of 50 -100 tubestock each year along with ongoing seedling removal. Increasing species diversity and local native species density is the focus as total eradication is unlikely.</p> <p><b>*African Boxthorn (<i>Lycium ferocissim</i>)</b> Small number of plants amongst coastal vegetation. To be removed when <i>Acacia cyclops</i> removal occurs.</p> <p><b>*Aleppo Pine (<i>Pinus halepensis</i>)</b> To be removed as other woody weed removal occurs.</p> <p><b>*Fountain Grass (<i>Cenchrus setaceus</i>)</b> Highly invasive, opposite Beach Road. Recommend immediate removal, both mechanical and spray. This plant has a long lived seed so ongoing follow up will be required.</p> <p><b>Golden Pallenis (<i>Asteriscus spinosus</i>)</b> Dense along walking trail in November. Highly invasive.</p> <p><b>* Gazania (<i>Gazania</i> sp)</b> Located next to tidal pool on foreshore.</p> <p><b>*Lincoln Weed (<i>Diplotaxis tenuifolia</i>)</b> Located along foreshore.</p> <p><b>*False Caper (<i>Euphorbia terracina</i>)</b> Low density along walking trail.</p> <p><b>*Bridal Creeper (<i>Asparagus asparagoides</i>)</b> Present at northern end of walking trail directly south of 6348 St Vincent Highway.</p> <p><b>*Bridal Veil (<i>Asparagus declinatus</i>)</b> Present on walking trail.</p> <p>Introduced annual grasses Are in high density throughout this area. Larger patches of introduced grass to be slashed prior to seeding. These areas are ideal for bush restoration, removing all weeds and revegetating with local native species.</p> <p><b>LOW PRIORITY (MONITOR)</b></p> <p>Tree Tobacco, False Sow-thistle, Tree Mallow, Arabian Star-flower, Agapanthus, Wild Sage, Wild Mustard, Cut-leaf Mignonette, Onion Weed, Soursob, Pincushion Flower</p> <ul style="list-style-type: none"> <li>• Platypus Gum (<i>Eucalyptus platypus</i>), Showy Honey Myrtle (<i>Melaleuca nesophila</i>) and other trees in small numbers</li> <li>• Reed Grass species - a small patch growing opposite Cross Street</li> <li>• Coastal Galenia is a mat forming plant. Abundant along top of cliff from Giles Terrace towards the jetty</li> </ul>

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

<b>Conservation significance</b>	<ul style="list-style-type: none"> <li>Coastal Action Plan Cell 39. Considered lowest conservation priority with the highest threat priority (Caton et al. 2007)</li> <li>The following listed fauna have been recorded from the Edithburgh area: Cape Barren Goose (SA:R), Far Eastern Curlew (AUS:CR, SA:V, YP:VU), Grey-tailed Tattler (SA:R), Musk Duck(SA:R, YP:RA)</li> </ul>
<b>Active Community Groups and projects</b>	Edithburgh Progress Association
<b>Summary of Site Recommendations</b>	<p>This area is highly modified. There is no benefit in removing the established, non-invasive, introduced trees but they should be replaced with locally native species when they die. Weed removal and revegetation is required along the Edithburgh to Coobowie walking trail and should be undertaken in stages, focusing on project areas. The amount of revegetation undertaken per year is dependent on the community capacity to assist with monitoring and the removal of weed species seedlings in revegetation areas.</p> <ul style="list-style-type: none"> <li>Stage 1: Rehabilitate larger areas of introduced grasses starting with weed control followed by revegetation to increase density of native species (150 - 200 tubestock)</li> <li>Stage 2: Small patches of woody weed removal followed by revegetation and ongoing seedling removal. Small areas of woody weeds to be removed at any time to avoid erosion (50-100 tubestock per annum)</li> <li>Interpretive signage about the marine life under the jetty (Pyjama Squid and Sea Dragons) to be installed between Edith Street and the jetty (possibly at the shelter). Consult with Edithburgh Progress Association</li> <li>Investigate fencing options across the front of the Edithburgh cemetery to stop plastic flowers reaching coastal areas</li> </ul>

Fountain Grass

Coastal Galenia

## 5.4 Sultana Point

<b>Site Description</b>	Sultana Point is a small coastal town located 4.5 kilometres south of Edithburgh via Sultana Point Road. This plan includes the area from the northern end of Sultana Point Road to the Council Reserves south of the point.	
<b>Recreational activities</b>	Fishing, Walk the Yorke (WTY), snorkelling, swimming.	
<b>Existing infrastructure</b>	<p><b>Council reserve - Area A</b></p> <ul style="list-style-type: none"> <li>Formalised gravel walking path</li> <li>'Where are those big ships going?' sign</li> <li>'Sultana Point' sign</li> <li>Bench seat</li> <li>Dog tidy dispenser</li> </ul> <p><b>Council reserve - Area B</b></p> <ul style="list-style-type: none"> <li>Formalised gravel car park at southern end of Sultana Point Road</li> <li>WTY 'A haven for birds and butterflies' sign</li> <li>WTY 'Our fragile beaches and dunes' sign</li> <li>'Camping prohibited' sign</li> <li>Informal walking trail (mainly sand)</li> </ul>	<p><b>Crown Land walking trail - Area C</b></p> <ul style="list-style-type: none"> <li>Formalised gravel walking path</li> <li>'Danger blue-ringed octopus and Razorfish' sign</li> <li>'Reef walking' sign</li> <li>'No vehicles sign' x 4</li> <li>'Take care of the environment' sign</li> <li>'Troubridge Island' sign</li> <li>Bench seat</li> </ul> <p><b>Crown Land - Area D</b></p> <ul style="list-style-type: none"> <li>Formalised bitumen car park</li> <li>'Yorke Peninsula - Code of the Coast' sign</li> <li>'No dumping' sign</li> <li>'No vehicle access' sign</li> <li>'Your rubbish is yours' sign</li> <li>'Community conservation project' sign</li> <li>Public toilet</li> </ul>
<b>Threats</b>	Illegal dumping, camping, vehicle use, weeds (including garden escapes), unauthorised removal of vegetation, pest animals, non-vehicle access, loss of Narungga cultural heritage	
<b>Community Land Management Category</b>	Crown Licence	

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

<b>Landform</b>	<ol style="list-style-type: none"> <li>1. Hind dune</li> <li>2. Saline flat</li> </ol>
<b>Native vegetation type</b>	<ol style="list-style-type: none"> <li>1. Open Coastal Shrubland</li> <li>2. Samphire Low Shrubland +/-emergent <i>Myoporum insulare</i></li> </ol>
<b>Native vegetation condition</b>	<p>BushRat Scores:</p> <ol style="list-style-type: none"> <li>1. 46.2 (medium)</li> <li>2. 60.27 (medium - high)</li> </ol>
<b>Dominant flora</b>	<ol style="list-style-type: none"> <li>1. Coastal Wattle (<i>Acacia longifolia</i> ssp. <i>sophorae</i>), Sea Box (<i>Alyxia buxifolia</i>), Native Pigface (<i>Carpobrotus rossii</i>), Knobby Club-rush (<i>Ficinia nodosa</i>), Coast Beard-heath (<i>Leucopogon parviflorus</i>), Coast Daisy-bush (<i>Olearia axillaris</i>)</li> <li>2. Native Pigface (<i>Carpobrotus rossii</i>), Common Boobialla (<i>Myoporum insulare</i>), Nitre Bush (<i>Nitraria billardierei</i>), Samphire (<i>Tecticornia</i> sp.), Salt Bluebush (<i>Maireana oppositifolia</i>), Creeping Brookweed (<i>Samolus repens</i>)</li> </ol>
<b>Weeds</b>	<p><b>HIGH PRIORITY</b></p> <p><b>Western Coastal Wattle (<i>Acacia cyclops</i>)</b> Heavy infestation throughout reserves and foreshore. Aim is reduction as eradication is unlikely. Start from areas that are easily accessible so follow up seedling removal can occur.</p> <p>Remove from Area C in consultation with Crown Land Office during Aleppo Pine removal as eradication from this area is achievable (additional 1 day).</p> <p><b>*Bridal Creeper (<i>Asparagus asparagoides</i>)</b> Present in Area B. Check for Rust Fungus and introduce if not present.</p> <p><b>*African Boxthorn (<i>Lycium ferocissimum</i>)</b> Small Boxthorns at northern end of Area B near road and 2 small Boxthorns on dirt mound at end of gravel car park. Lop and swab or spray. 1 - 2 hours work.</p> <p><b>*Aleppo Pines (<i>Pinus halepensis</i>)</b> Consult with Crown Land Office about removal from this area while Pines are still small and the job is manageable. Revegetate area with low native shrubs (100 tubestock). Pines are also present at southern end of Area A. The main seed source is present on the neighbouring property and a coordinated approach would be required (1 day).</p> <p><b>*Myrtle-leaf Milkwort (<i>Polygala myrtifolia</i>)</b> Present in Area B. Dense in parts.</p> <p><b>Marguerite Daisy (<i>Argyranthemum frutescens</i>)</b> Throughout Area B.</p> <p><b>LOW PRIORITY (MONITOR)</b></p> <p>Long-fruited Wild Turnip, annual grasses.</p>

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

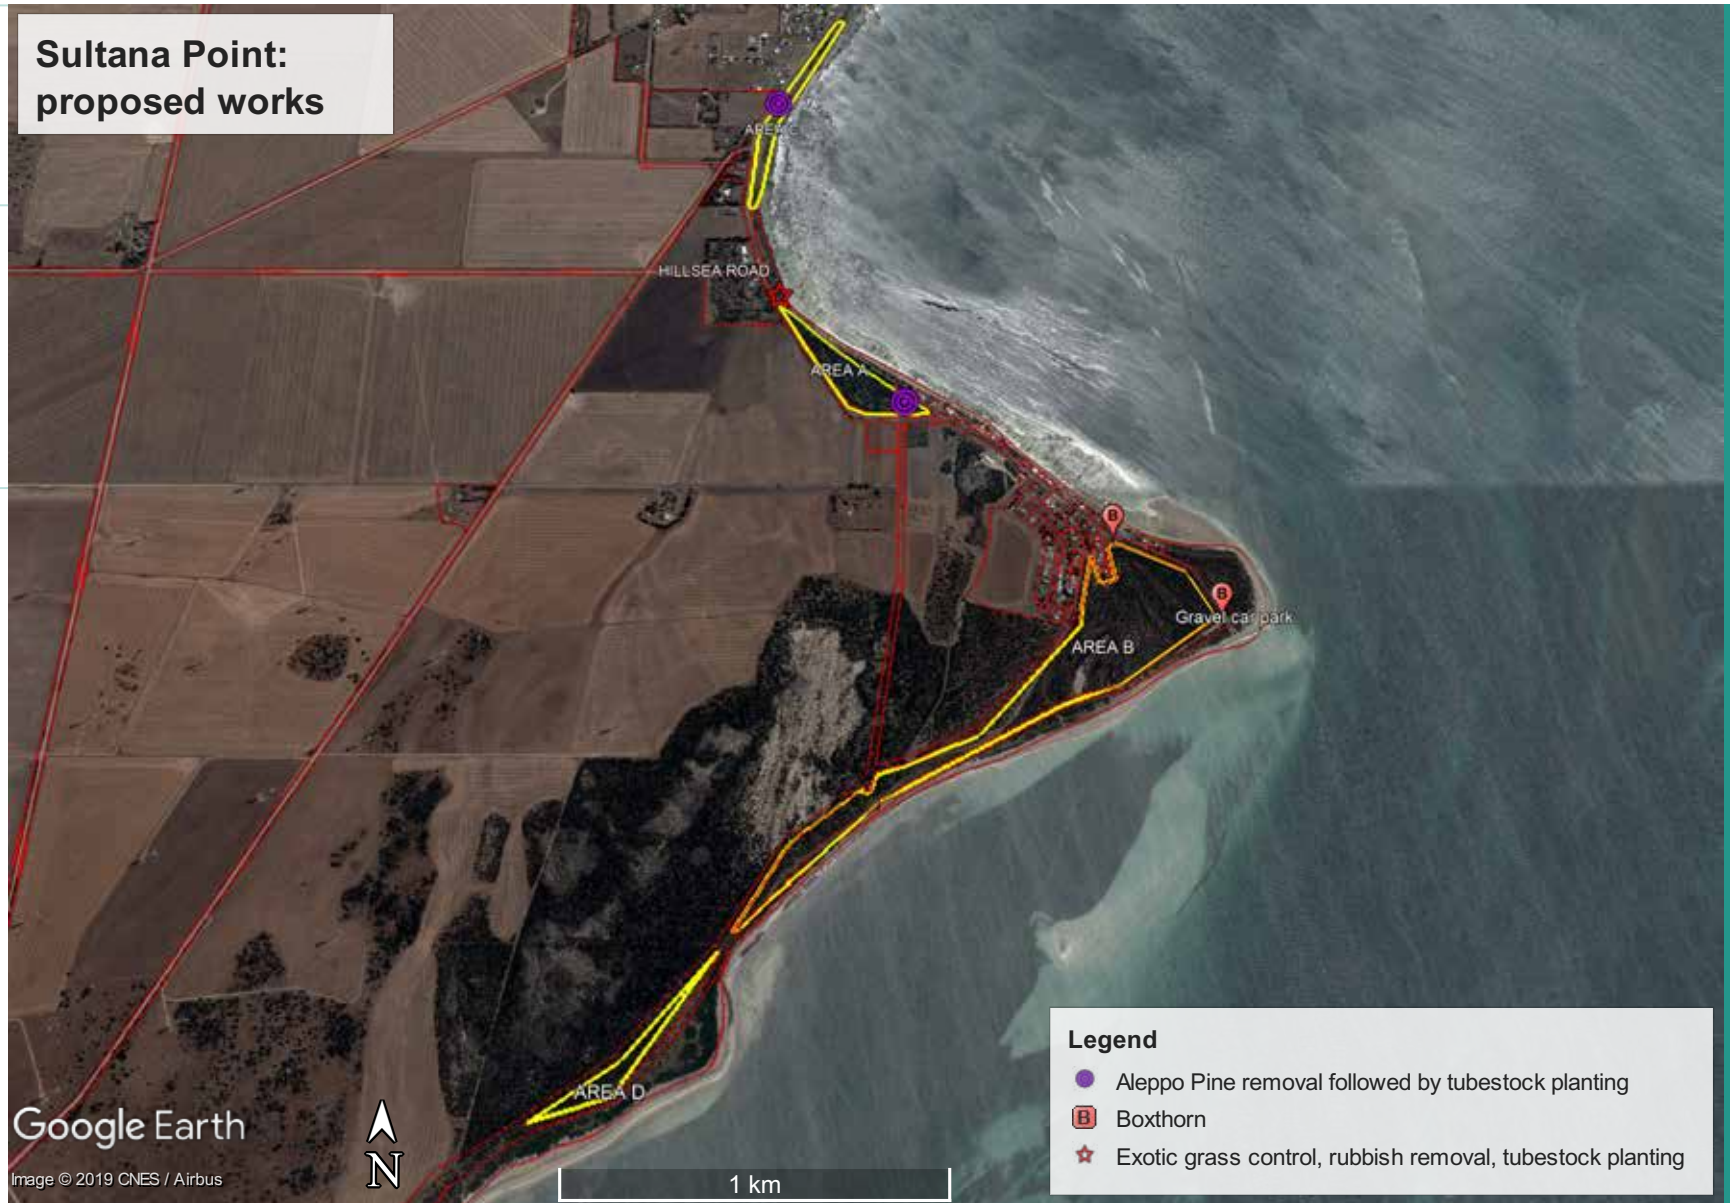

<b>Conservation significance</b>	<ul style="list-style-type: none"> <li>Coastal Action Plan Cell 41. Considered lowest conservation priority with highest threat, based on coastal cell conservation analysis (Caton et al. 2007)</li> <li>The following listed fauna have been recorded along this section of coast: Australian Bustard (SA:V), Double-banded Plover (YP:RA)</li> <li>Culturally significant sites acknowledged</li> </ul>
<b>Active Community Groups and projects</b>	No current projects
<b>Summary of Site Recommendations</b>	<ul style="list-style-type: none"> <li>North end of path (south of Hillsea Road) requires control of introduced grasses and removal of rubble followed by a small amount of revegetation with shrubs (20 tubestock)</li> <li>Woody weed control</li> <li>Revegetation</li> </ul>

Area at north end of path (Area A)

Juvenile Aleppo Pines (Area C)

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### 5.5 Wattle Point Campground and Heel Road Reserve

<b>Site Description</b>	Wattle Point is located 8 kilometres southwest of Edithburgh. Access is off Heel Road via Wattle Point Road, Edithburgh. This plan includes the surrounding reserve ending at Goldsmith Beach Road.	
<b>Recreational activities</b>	Fishing, Walk the Yorke (WTY), swimming, camping.	
<b>Existing infrastructure</b>	<b>Wattle Point Campground</b> <ul style="list-style-type: none"> <li>Shelter with picnic table and water tank</li> <li>'Bush camping and permit required' sign</li> <li>'Bush camping services' sign</li> <li>Beach boat launch/vehicle access to beach</li> <li>Broken fence on eastern boundary</li> </ul>	<b>Adjoining reserve</b> <ul style="list-style-type: none"> <li>Car park with bench at Wattle Point/Heel Road intersection</li> <li>Informal track to beach at Wattle Point/Heel Road intersection</li> <li>2 small informal pull-off areas 700 metres and 900 metres west of campground</li> </ul>
<b>Threats</b>	Illegal dumping, camping, vehicle use, weeds, unauthorised removal of vegetation, pest animals, non-vehicle access, loss of Narungga cultural heritage	
<b>Community Land Management Category</b>	Crown Licence	
<b>Landform</b>	Low dune/limestone flat	
<b>Native vegetation type</b>	1. Coastal Shrubland/Drooping Sheoak Woodland 2. Sedgeland	
<b>Native vegetation condition</b>	BushRAT Score: 60.23 (medium-high)	
<b>Dominant flora</b>	1. Drooping Sheoak ( <i>Allocasuarina verticillata</i> ), Coast Daisy-bush ( <i>Olearia axillaris</i> ), Coast Beard-heath ( <i>Leucopogon parviflorus</i> ), Common Boobialla ( <i>Myoporum insulare</i> ), Coast Golden Wattle ( <i>Acacia leiophylla</i> ), Sweet Bursaria ( <i>Bursaria spinosa</i> ) 2. Black Grass saw-sedge ( <i>Gahnia lanigera</i> ), Sticky Sword-sedge ( <i>Lepidosperma viscidum</i> ), Hard Mat-rush ( <i>Lomandra mutiflora</i> ssp.), Sand Mat-rush ( <i>Lomandra collina</i> ), Short-stem Flax-lily ( <i>Dianella brevicaulis</i> ), Spear Grass ( <i>Austrostipa</i> sp.), Drooping Sheoak ( <i>Allocasuarina verticillata</i> )	

<b>Weeds</b>	<p><b>HIGH PRIORITY</b></p> <p><b>*African Boxthorn (<i>Lycium ferocissimum</i>)</b> One small plant by the shelter (lop and swab) and several large plants adjacent to the track to the beach (spray).</p> <p><b>*Bridal Creeper (<i>Asparagus asparagoides</i>)</b> Frequent. Introduce Rust Fungus.</p> <p><b>Western Coastal Wattle (<i>Acacia cyclops</i>)</b> Two days of cutting (when not seeding) around campground and surrounding area to give native species an opportunity to recover. Unlikely to eradicate.</p> <p><b>Olive (<i>Olea Europea</i>)</b> One plant 20 metres southwest of campground.</p> <p><b>LOW PRIORITY (MONITOR)</b></p> <p>False Sowthistle, Onion Weed, introduced grasses, Pincushion, Wild Sage, Long-fruited Wild Turnip</p> <p>Recorded previously but not sighted : *False Caper</p>
<b>Conservation significance</b>	<ul style="list-style-type: none"> <li>Coastal Action Plan Cell 41. Considered lowest conservation priority with medium threat, based on coastal cell conservation analysis (Caton et al. 2007)</li> <li>The following listed fauna have been recorded along this section of coast: Ruddy Turnstone (SA:R), Curlew Sandpiper (AUS:CR), Great Knot (AUS:CR, SA:R), Fairy Tern (AUS:VU, SA:E, YP:EN), Hooded Plover (AUS:VU, SA:V), Sooty Oystercatcher (SA:R, YP:RA)</li> <li>The following listed flora have been recorded along this coast: Heart-lip Spider-orchid (<i>Caladenia cardiochila</i>) (YP:VU)</li> </ul>
<b>Active Community Groups and projects</b>	Some revegetation by local community
<b>Summary of Site Recommendations</b>	<p><b>Wattle Point Campground</b></p> <ul style="list-style-type: none"> <li>Place rocks around southern boundary of southwestern campsite to prevent erosion and encourage one access point to beach</li> <li>Revegetate sand dune at south western corner of campground encouraging access to the beach via one narrow track (30 tubestock)</li> <li>Monitor vehicle access track to beach. Currently low impact. May need temporary closure during beach-nesting bird breeding season if breeding territory identified</li> <li>Compost toilet with water tank</li> </ul>

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### Adjoining reserve

- Close and revegetate the western section of the double track at the intersection of Wattle Point Road and Heel Road as it is susceptible to sand dune drift (30 tubestock)
- Replace Coastal Moort (*Eucalyptus utilis*) with native species as it dies
- Monitor small pull-off areas west of campground. Currently low impact

Track on Heel Road/Wattle Point Road intersection

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

**Wattle Point campground:  
proposed works****Legend**

-  Border this area with rocks
-  Compost Toilet and water tank
-  Encourage single access track to beach
-  Fence
-  Preferred single access track to beach
-  Revegetate

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### 5.6 Goldsmith's Beach campground and reserve

<b>Site Description</b>	Goldsmith's Beach campground is located 10 kilometres southwest of Edithburgh. Access is from Troubridge Point Drive, via Heel Road. This plan includes the reserve south of the campground.	
<b>Recreational activities</b>	Fishing, Walk the Yorke (WTY), swimming, camping.	
<b>Existing infrastructure</b>	<b>Goldsmiths Beach Campground</b> <ul style="list-style-type: none"> <li>• 'Bush camping with permit required' signage</li> <li>• 'Bush Camping Services' sign</li> <li>• WTY 'Can you spot the difference?' sign</li> <li>• Area One – 3 small campsites</li> <li>• Area Two – 1 large and 2 small campsites</li> <li>• Area Three – 3-4 campsites</li> </ul>	<b>Adjoining reserve</b> <ul style="list-style-type: none"> <li>• 4 informal vehicle tracks through to beach</li> <li>• Bench seat</li> </ul>
<b>Threats</b>	Illegal dumping, camping, vehicle use, weeds, unauthorised removal of vegetation, pest animals, non-vehicle access, loss of Narungga cultural heritage	
<b>Community Land Management Category</b>	Reserve on Troubridge Point Road including campground - Community Reserve Sec 679 (north of Goldsmith Beach Road) – Crown Licence	
<b>Landform</b>	1. Low dune 2. Limestone flat	
<b>Native vegetation type</b>	3. Coastal Shrubland +/- <i>Allocasuarina verticillata</i> 4. Sedgeland +/- <i>Allocasuarina verticillata</i>	
<b>Native vegetation condition</b>	BushRAT Score: Sedgeland 66.16 (high)	

<b>Dominant flora</b>	<ol style="list-style-type: none"> <li>1. Drooping Sheoak (<i>Allocasuarina verticillata</i>), Coast Daisy-bush (<i>Olearia axillaris</i>), Coast Beard-heath (<i>Leucopogon parviflorus</i>), Common Boobialla (<i>Myoporum insulare</i>), Coast Golden Wattle (<i>Acacia leiophylla</i>), Sweet Bursaria (<i>Bursaria spinosa</i>)</li> <li>2. Black Grass saw-sedge (<i>Gahnia lanigera</i>), Sticky Sword-sedge (<i>Lepidosperma viscidum</i>), Hard Mat-rush (<i>Lomandra mutiflora</i> ssp.), Sand Mat-rush (<i>Lomandra collina</i>), Wedge-leaf Pomaderris (<i>Pomaderris obcordata</i>), Short-stem Flax-lily (<i>Dianella brevicaulis</i>), Spear Grass (<i>Austrostipa</i> sp.), Drooping Sheoak (<i>Allocasuarina verticillata</i>)</li> </ol>
<b>Weeds</b>	<p><b>HIGH PRIORITY</b></p> <p><b>*African Boxthorn (<i>Lycium ferocissimum</i>)</b> Remove one small Boxthorn on boundary of campground and Troubridge Road.</p> <p><b>Western Coastal Wattle (<i>Acacia cyclops</i>)</b> Low density. 2 days of cutting working out from the campground.</p> <p><b>*Bridal Creeper (<i>Asparagus asparagoides</i>)</b> One plant noted south of campground.</p> <p><b>Cactus Plant</b> Located at track 3 on Troubridge Point Road. Remove before it spreads further.</p> <p><b>LOW PRIORITY (MONITOR)</b></p> <p>Tuart Gum, False Sowthistle, Onion Weed, introduced grasses, Horehound, Golden Wreath Wattle, Capeweed, Wild Sage, Aleppo Pine (one plant south of campsite), Polygala (one plant 120 metres west of campsite)</p> <p>Golden Palensis, Horehound and *Lincoln Weed widespread at 'track 3'.</p> <p>Recorded previously but not present during survey: Freesia, *False Caper, Soursob</p>
<b>Conservation significance</b>	<ul style="list-style-type: none"> <li>• Coastal Action Plan Cell 41. Considered lowest conservation priority with medium threat, based on coastal cell conservation analysis (Caton et al. 2007)</li> <li>• The sedgeland area southwest of the campground has high conservation value including native orchids</li> <li>• The following listed fauna have been recorded along this section of coast: Ruddy Turnstone (SA:R), Curlew Sandpiper (AUS:CR), Great Knot (AUS:CR, SA:R), Fairy Tern (AUS:VU, SA:E, YP:EN)</li> <li>• The following listed flora have been recorded along this coast: Heart-lip Spider-orchid (<i>Caladenia cardiochila</i>) (YP:VU)</li> </ul>

## SITE DESCRIPTIONS AND RECOMMENDATIONS

<b>Community Land Management Category</b>	5744/658 (east) - Crown Licence 5772/145 (west) - Community Land
<b>Landform</b>	1. Clifftop 2. Dune
<b>Native vegetation type</b>	Coastal Shrubland
<b>Native vegetation condition</b>	BushRAT Condition score: East - 62.96 (medium - high) West - 49.91 (medium)
<b>Dominant flora</b>	Sea Box ( <i>Alyxia buxifolia</i> ), Drooping Sheoak ( <i>Allocasuarina verticillata</i> ), Dryland Tea-tree ( <i>Melaleuca lanceolata</i> ), Dune Tea-tree ( <i>Leptospermum coriaceum</i> ), Sweet Bursaria ( <i>Bursaria spinosa</i> ), Cockie's Tongue ( <i>Templetonia retusa</i> ), Coast Beard-heath ( <i>Leucopogon parviflorus</i> ), Coast Daisy-bush ( <i>Olearia axillaris</i> ), Coast Wallowa ( <i>Acacia nematophylla</i> ), Winged Wattle ( <i>Acacia sp. Winged</i> ), Coast Velvet-bush ( <i>Lasiopetalum discolor</i> ), Common Boobialla ( <i>Myoporum insulare</i> ), Native Pigface ( <i>Carpobrotus rossii</i> ), Coastal Cushion-bush ( <i>Leucophyta brownii</i> ), Seaberry Saltbush ( <i>Rhagodia candolleana</i> ), Prickly Ground-berry ( <i>Acrotriche patula</i> ), Dense Bush-pea ( <i>Pultenaea densifolia</i> ), Sticky Goodenia ( <i>Goodenia varia</i> ), Pale Mat-rush ( <i>Lomandra collina</i> ), Dense Coast Sword-sedge ( <i>Lepidosperma gladiatum</i> ), Short-stem Flax-lily ( <i>Dianella brevicaulis</i> )
<b>Weeds</b>	<p><b>HIGH PRIORITY</b></p> <p><b>*African Boxthorn (<i>Lycium ferocissim</i>)</b> Small numbers of African Boxthorn are present and should be removed along with <i>Acacia cyclops</i></p> <p><b>*Gazania sp. (Gazania sp.)</b> Present on Marine Parade near the boat ramp and towards the Coastal Garden and at the front of the Mc Eachern's Beach Road car park (priority area). Highly invasive, remove to prevent further spread in coordination with replacement with low growing native flowering species. Start at Mc Eachern's Beach car park due to proximity to sand dunes.</p> <p><b>*Bridal Creeper (<i>Asparagus asparagoides</i>)</b> Present alongside path from the Coastal Garden to beach. No Rust Fungus present on plants. Spread Fungus from a plant with spores in October to limit spread.</p> <p><b>*Lincoln Weed (<i>Diplotaxis tenuifolia</i>)</b> Abundant along the Marine Parade section of the walking trail. Community members currently undertaking some control.</p> <p><b>Western Coastal Wattle (<i>Acacia cyclops</i>)</b> Widespread and abundant throughout coastal strip. Staged removal during winter months over a minimum of 10 years is recommended to minimise erosion and spread of seed. Revegetation with locally native tubestock to follow removal starting from the Eastern area. Total eradication is unlikely. The aim is to reduce the dominance of this species and to increase indigenous species diversity.</p>

	<p><b>LOW PRIORITY (MONITOR)</b></p> <p>False Sowthistle, Onion Weed, Blue Pimpernel, Capeweed, Annual Grasses, Sea Lavender</p> <p>Sea Spurge - present at Boat Ramp</p> <p>Platypus Gum, Tuart Gum, and Showy Honey-myrtle to be replaced with locally native species once they die.</p>
<b>Conservation significance</b>	<ul style="list-style-type: none"> <li>• Port Moorowie Township Coastal Action Plan Cell 45. Considered a low conservation priority with a high threat (Caton et al. 2007)</li> <li>• The following listed fauna have been recorded from the Port Moorowie area: Hooded Plover (SA:V), Crested Bellbird (YP:EN), Blue Bonnet (SA:NC)</li> <li>• Recent sightings of Southern Hairy-nosed Wombat and Sand Goanna, G. Kempson and G. Burt (pers. comm. Dec 2018)</li> <li>• Culturally significant sites acknowledged</li> </ul>
<b>Active Community Groups and projects</b>	<p><b>Friends of Port Moorowie (FOPM)</b></p> <p>FOPM undertake mowing and some weed control along Marine Parade area, mainly Lincoln Weed and Western Coastal Wattle. Revegetation is taking place in the Point Gilbert area.</p> <p>Community members are currently (2018-19) removing <i>Acacia cyclops</i> and undertaking revegetation from Waltoo Terrace car park to Point Reef stairs.</p>
<b>Summary of Site Recommendations</b>	<ul style="list-style-type: none"> <li>• Consult with the Department for Environment and Water (DEW) regarding potential revegetation of land east of Mc Eachern's Beach Road, to provide an uninterrupted wildlife corridor across this section of coast</li> <li>• Partake in any coordinated pest control programs that are offered by Natural Resources Northern and Yorke/DEW to address rabbits</li> </ul> <p><b>Mc Eachern's Beach Rd – West Terrace (East)</b></p> <ul style="list-style-type: none"> <li>• Install WTY interpretive signage (in consultation with the community)</li> <li>• Revegetate with approximately 50 tubestock per year</li> <li>• Remove and replace Gazanias with native low growing species</li> <li>• Install 'No motorbikes sign' at path entrance</li> </ul> <p><b>Marine Parade – Coastal Garden (Central)</b></p> <ul style="list-style-type: none"> <li>• Stage woody weed removal over 10 - 20 years with follow up of seedling removal</li> <li>• Replace Gazanias with low growing native species e.g. Coast Cushion Bush, Short-stem Flax-lily, Angled Wattle, Running Postman, Native Pigface, Cushion Fanflower</li> </ul>

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

- Install WTY interpretive signage
- Review and consolidate multiple signs at eastern car park
- Boat ramp African Boxthorn and Sea Spurge weed control
- Review and consolidate the boat ramp signs
- Install 'No motorbikes sign' at path entrance

### Coastal Garden – Point Gilbert (West)

- Install WTY interpretive signage
- Woody weed removal and revegetation over 10 years, up to 200 tubestock per year
- Install 'Wood collection/removal prohibited' signage
- Tubestock to be planted annually in all areas as woody weeds are removed. A good mix of fire resistant species to be included e.g. Sweet Bursaria, Common Boobialla, local Acacia species, Sea Box and Fleshy Saltbush
- Install 'No motorbikes sign' at path entrance
- Place tree guards on natural regeneration to protect from rabbits and allow for brush cutting of annual grasses if necessary

### West of Point Gilbert

- Revegetate with salt tolerant species in low lying open areas. 200 tubestock. Suggested species include: *Alyxia buxifolia*, *Rhagodia crassifolia*, *Dianella revoluta*, *Melaleuca lanceolata*, *Acacia nematophylla*, *Adriana quadripartita* and *Bursaria spinosa*
- Remove the small number of *Acacia cyclops* in this area and emerging seedlings

Gazanias

Busy signage

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### Daly Head Road- Dustbowl

- Steps from car park to Daly Head surf break. Refer to 'Beach access stairs Daly Head project plan'
- Compost toilet at Salmon Hole car park in small overflow car park in consultation with FBEAG
- Level and maintain Salmon Hole car park which gets the heaviest visitation in this area
- Place small boulders on the western side of the car park at the coast end to protect the vegetation where erosion is occurring
- Council to develop an engineered design that meets current standards for access, car parking and public requirements in the Daly Head/Dustbowl headland area with minimal impact to vegetation
- Appropriate speed limits implemented

*Pyp Grass*

*Staircase required at Daly Head surf break*

*Border of rocks at Salmon Hole to prevent erosion*

*Toilet to be located in side car park Salmon Hole*

## SITE DESCRIPTIONS AND RECOMMENDATIONS

<b>Active Community Groups and projects</b>	<p>Southern Yorke Peninsula Landcare and Northern and Yorke Natural Resources are currently scoping the Osprey Artificial Nest Platform project which may include this area.</p> <p>Corny Point Progress Association manage recycling bins.</p>
<b>Summary of Site Recommendations</b>	<ul style="list-style-type: none"> <li>• 'No firewood collection' signage near entrance</li> <li>• Boxthorn removal throughout campground. Spray and cut and swab required</li> <li>• Upgrade drop toilets to compost toilets with disability access when funds permit</li> <li>• 25 kilometre per hour speed limit throughout campground with additional 'slow' signage at blind corners between sites 10 and 14</li> </ul> <p><b>Site 1</b></p> <ul style="list-style-type: none"> <li>• Small amount of revegetation in degraded areas of sand dune with following species: <i>Olearia axillaris</i>, <i>Acacia sp. Winged</i>, <i>Scaevola crassifolia</i>, <i>Eucalyptus Diversifolia</i> and <i>Rhagodia candolleana</i> (50 tubestock)</li> <li>• Monitor access to this site as the cliff top area is very narrow and vulnerable to further erosion from storm events</li> </ul> <p><b>Site 2</b></p> <ul style="list-style-type: none"> <li>• Small amount of revegetation in degraded areas of sand dune with following species: <i>Olearia axillaris</i>, <i>Acacia sp. Winged</i>, <i>Scaevola crassifolia</i>, <i>Atriplex cinerea</i> and <i>Leucophyta brownii</i> (100 tubestock)</li> <li>• Small boulders to border around the edge of the vegetation in the small campsite (on western side of track), southwest of main camp area</li> </ul> <p><b>Site 3</b></p> <ul style="list-style-type: none"> <li>• Fence north and east corner (approximately 22 metres)</li> </ul> <p><b>Site 4</b></p> <ul style="list-style-type: none"> <li>• Fence area to the west along track to beach (approximately 13 metres)</li> </ul> <p><b>Site 5</b></p> <ul style="list-style-type: none"> <li>• Dutchman's Ladder on both tracks to beach (approximately 65 metres)</li> <li>• Revegetate between the two access tracks where the dune has eroded, include: <i>Olearia axillaris</i>, <i>Acacia sp. Winged</i>, <i>Scaevola crassifolia</i>, <i>Atriplex cinerea</i>, <i>Leucophyta brownii</i>, and <i>Rhagodia candolleana</i> (approximately 100 tubestock)</li> <li>• Revegetate the small dunes within the campground with indigenous coastal shrubs and <i>Euc. diversifolia</i> (10 tubestock)</li> </ul> <p><b>Site 6</b></p> <ul style="list-style-type: none"> <li>• Add a layer of soil and level site</li> </ul> <p><b>Site 7</b></p> <ul style="list-style-type: none"> <li>• Revegetate blowout with indigenous species (20 tubestock)</li> <li>• Add a layer of soil and level site</li> </ul>

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### Site 8

- Plant 2-3 *Euc.diversifolia* out from post in centre

### Site 9

- Add a layer of soil and level site. This site has eroded severely
- Plant 3 trees at the front section in the middle of the site and one in the rear southern corner (this will reduce erosion by restricting traffic movement and provide some shade)
- Level small mound at southern entrance

### Site 10

- Add a layer of soil and level site
- Revegetate the foredune and goat tracks with *Scaevola crassifolia*, *Leucophyta brownii*, *Atriplex*

### Site 11

- Add a layer of soil and level site
- Revegetate southern end (over fence) with indigenous shrubs (approximately 50 tubestock)
- Enhance vegetation between the site and road with indigenous shrubs (10 tubestock) and plant *Carpobrotus rossii* and *Leucophyta brownii* on foredune (approximately 20 tubestock)

### Site 12

- Staircase to beach (low cliff)
- Reduce width of northern entrance. Plant two rows of 5 indigenous shrubs on southern side of entrance leaving northern side open. Plant tubestock back from the road carriageway to allow for visibility of oncoming traffic
- Revegetate mound at rear of site with indigenous shrubs (10 tubestock)
- Formalise the path to the beach with gravel between site 12 and 13 to prevent further erosion

### Site 13

- Fence southern boundary (approximately 19 metres)
- Revegetate southern dune (50 tubestock)
- Plant 2 *Myoporum insulare* in centre of entrance (for privacy and to reduce dust)

### Site 14

- Revegetate the dune between the campsite, the road and the path at the southern end of the site (30 tubestock)
- Define a track into the campsite along the perimeter with road base to reduce erosion from vehicles

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### Site 15 (The Landing)

- Formalise tracks at rear and front of camping area with road base
- Fill in large blowouts and level camping area in centre
- Place small boulders around the front edge of the vegetation at western end allowing for one small campsite
- Compost toilet with disability access next to rear boundary
- Install an interpretive sign about the history of the landing

### Site 16

- Repair fence around campsite or place boulders to block old tracks
- Revegetate tracks and blowout (80 tubestock)

### Site 17

- Close this campsite and revegetate track (50 tubestock). High level of erosion and rubbish at this site

### Site 18

- Staircase to beach (tall cliff)
- Place boulders across front of site 1.5 metres back from existing vegetation. Backfill with sand and cover with jute matting. Revegetate area with *Leucophyta browii*, *Scaevola crassifolia*, *Carpobrotus rossii* and *Poa poiformis* (50 tubestock). Allow for access to staircase, approximately 16 metres from northern boundary
- Place small boulders around the base of two eroded sand dunes at northern end of site. Back fill with sand and revegetate. Revegetate small mounds at southern end of site. Use species listed above
- Revegetate over fence at northern end with tall shrubs *Olearia axillaris*, *Nitraria billardierei* and *Acacia sp. Winged* (15 tubestock)

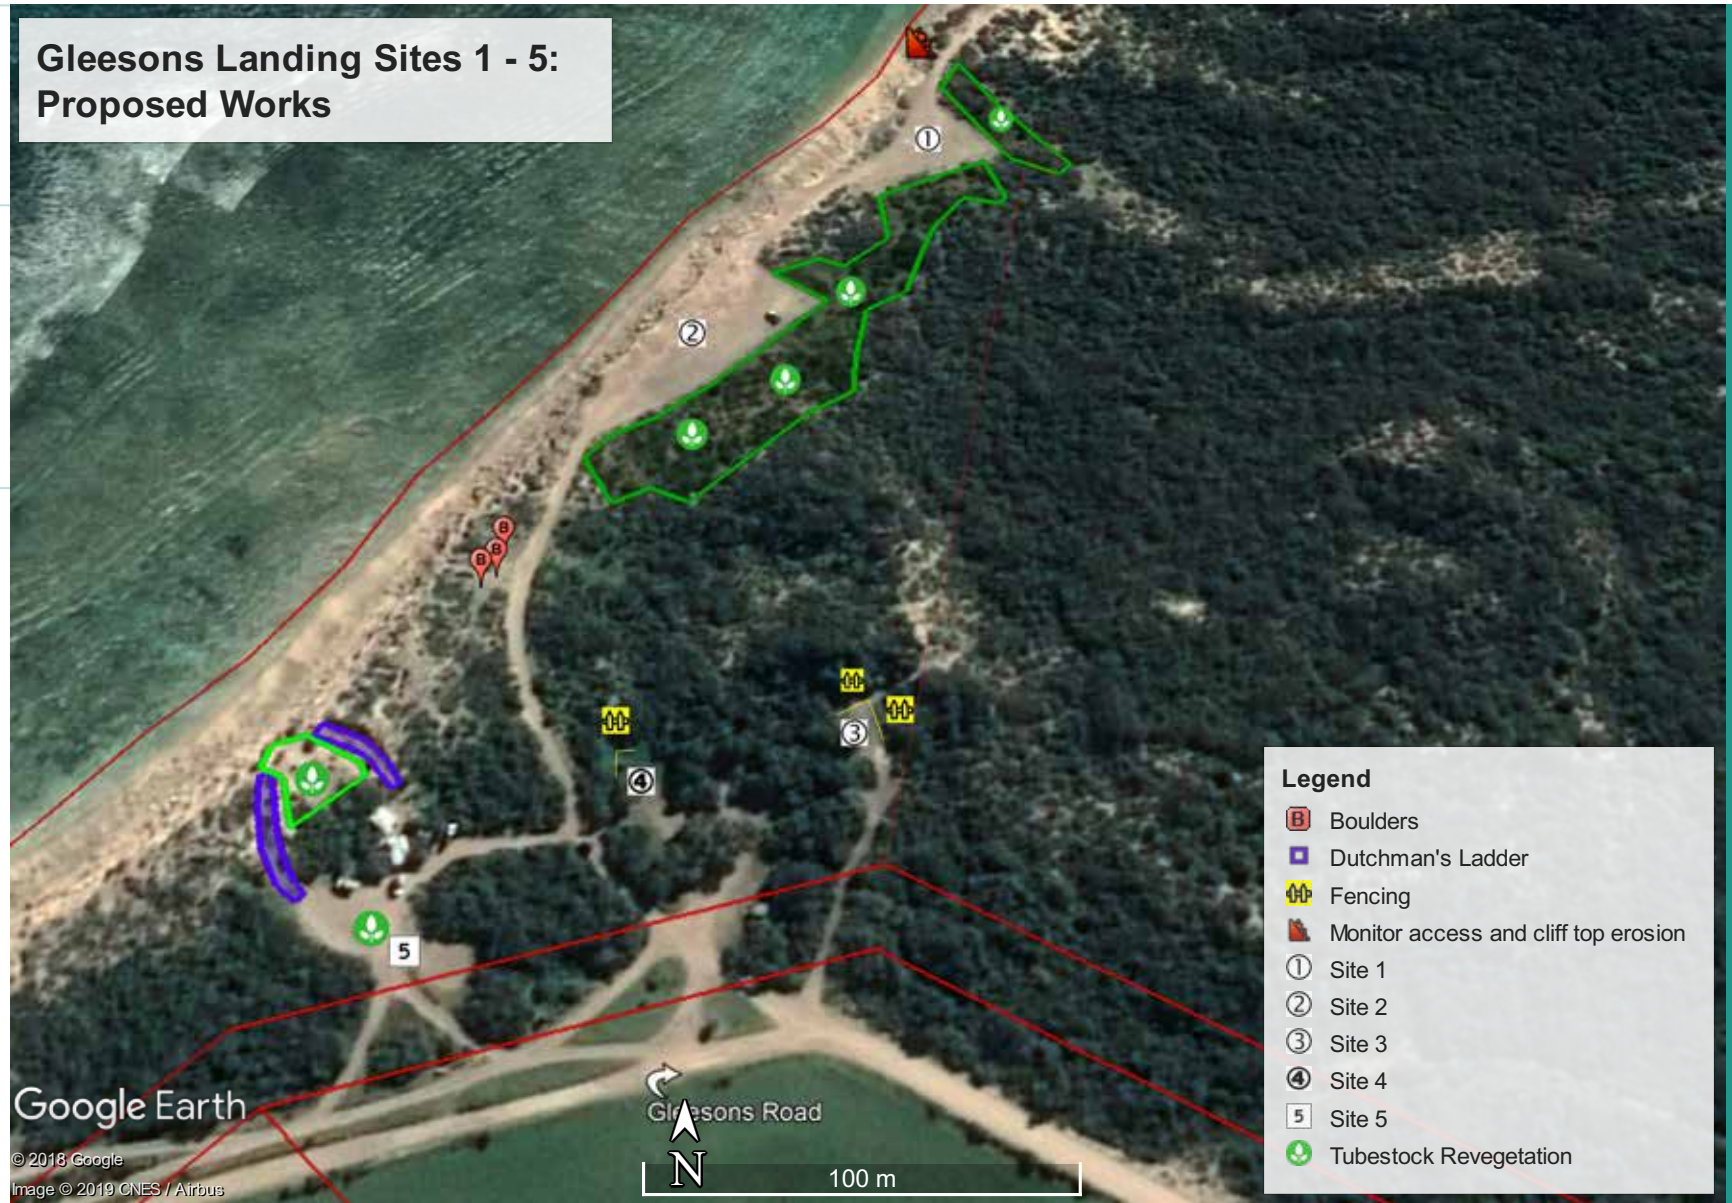

### Site 19

- Day visit car park
- Potential site for WTY Osprey/Sea Eagle interpretive sign

### Site 20

- Staircase and boardwalk to beach
- No motorbikes sign at southern end at WTY entrance
- Sea Spurge control and revegetation with native foredune species (30 tubestock)

## SITE DESCRIPTIONS AND RECOMMENDATIONS

### 5.23 Swincer Rocks Campground

<b>Site Description</b>	Swincer Rocks is a Council Bush Camping site. It is located at the corner of Wurlie Road and West Coast Road, 14 kilometres southwest of Corny Point.
<b>Recreational activities</b>	Camping, fishing, natural environment, Walk the Yorke (WTY), swimming.
<b>Existing infrastructure</b>	<ul style="list-style-type: none"> <li>• 'Bush Camping' sign</li> <li>• 'Permit required' sign</li> <li>• 'Rock Lobster Sanctuary' sign</li> <li>• WTY interpretive signage 'Dinosaur Footprints'</li> <li>• WTY 'Beach Walk' signage</li> <li>• 'Hooded Plover' sign</li> </ul>
<b>Threats</b>	Illegal dumping, camping, vehicle use, weeds, unauthorised removal of vegetation, pest animals, non-vehicle access, loss of Narungga cultural heritage
<b>Community Land Management Category</b>	Community Land
<b>Landform</b>	Low cliff/Cliff-top dune
<b>Native vegetation type</b>	Low Coastal Heath Small section of low <b><i>Chenopod</i></b> species (salt bush) at southern end of cliff-top.
<b>Native vegetation condition</b>	BushRAT score: Hind dunes - 54.04 (medium-high) Saline cliff-top - 41.48 (medium)
<b>Dominant flora</b>	Cushion Fanflower ( <i>Scaevola crassifolia</i> ), Coast Velvet-bush ( <i>Lasiopetalum discolor</i> ), Scrubby Cypress Pine ( <i>Callitris canescens</i> ), Coast Cushion Bush ( <i>Leucophyta brownii</i> ), Pale Turpentine Bush ( <i>Beyeria lechenaultii</i> ), Coast Daisy-bush ( <i>Olearia axillaris</i> ), Native Pigface ( <i>Carpobrotus rossii</i> ), Coast Flax-lily ( <i>Dianella brevicaulis</i> ), Sea Box ( <i>Alyxia buxifolia</i> ), Coast Wallowa ( <i>Acacia nematophylla</i> ), Shiny Ground-berry ( <i>Acrotriche patula</i> ), Nitre Bush ( <i>Nitraria billardieri</i> ), Salt Bluebush ( <i>Maireana oppositifolia</i> ), Coast Bonefruit ( <i>Threlkeldia diffusa</i> )

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

Weeds	<p><b>HIGH PRIORITY</b></p> <p><b>*African Boxthorn (<i>Lycium ferocissimum</i>)</b> At southern end of campground and one at entrance to be sprayed (2-3 hours labour).</p> <p><b>LOW PRIORITY (MONITOR)</b></p> <p>Ice Plant (<i>Mesembryanthemum crystallinum</i>), Sea Spurge (<i>Euphorbia paralias</i>), False Sow Thistle (<i>Reichardia tingitania</i>), Sea Lavender (<i>Limonium companyonis</i>), Soursob (<i>Oxalis pes-caprae</i>)</p>
Conservation significance	<ul style="list-style-type: none"> <li>Coastal Action Plan Cell 73. Highest conservation priority with the lowest threat based on coastal cell analysis (Caton et al. 2007)</li> <li>Adjoins the northern boundary of Thidna Conservation Park</li> <li>The following listed species have been recorded in this area: Hooded Plover (AUS:VU, SA:V), Sooty Oystercatcher (SA:R), Lined Earless Dragon (YP:RA), Ruddy Turnstone (SA:R)</li> <li>Culturally significant sites acknowledged</li> </ul>
Active Community Groups and projects	No current projects
Summary of Site Recommendations	<ul style="list-style-type: none"> <li>Formalise campsites, border with rocks and indigenous tubestock where possible (rocky site)</li> <li>Fence vegetation at northern end of campground, approximately 75 metres. Plant a Nitre Bush and Coast Daisy-bush as a wind break on mound at beachfront campsite. Revegetate adjacent track and degraded boundary (100 tubestock)</li> <li>Compost toilet with rain water tank at entrance</li> <li>Appropriate speed limits implemented</li> </ul>

Northern end of campground

Formalise separate campsites with vegetation

<b>Community Land Management Category</b>	Crown Licence	
<b>Landform</b>	Clifftop/sand dunes	

<b>Native vegetation type</b>	Coastal Shrubland
<b>Native vegetation condition</b>	BushRAT score: 64.27 (medium – high)
<b>Dominant flora</b>	<p>1. Cushion Fanflower (<i>Scaevola crassifolia</i>), West Coast Wattle (<i>Acacia sp. Winged</i>), Coast Velvet-bush (<i>Lasiopetalum discolor</i>), Coast Cushion Bush (<i>Leucophyta brownii</i>), Pale Turpentine Bush (<i>Beyeria lechenaultii</i>), Coast Daisy-bush (<i>Olearia axillaris</i>), Sticky Goodenia (<i>Goodenia varia</i>), Native Pigface (<i>Carpobrotus rossii</i>), Variable Groundsel (<i>Senecio pinnatifolius</i>), Black Grass Saw-sedge (<i>Gahnia lanigera</i>), Sword-sedge (<i>Lepidosperma sp.</i>), Sea Box (<i>Alyxia buxifolia</i>), Nitre-bush (<i>Nitraria billardierei</i>), Coast Twinleaf (<i>Zygophyllum billardierei</i>), Marsh Saltbush (<i>Atriplex paludosa</i>), Small-leaf Bluebush (<i>Maireana brevifolia</i>), Australian Boxthorn (<i>Lycium australe</i>)</p> <p>2. Cushion Fanflower (<i>Scaevola crassifolia</i>), Ruby Saltbush (<i>Enchylaena tomentosa</i>), Nitre-bush (<i>Nitraria billardierei</i>), Coast Bonefruit (<i>Threlkeldia diffusa</i>), Coast Daisy-bush (<i>Olearia axillaris</i>), Coast Cushion Bush (<i>Leucophyta brownii</i>), Knobby Club-rush (<i>Ficinia nodosa</i>), Variable Groundsel (<i>Senecio pinnatifolius</i>), Saltbush <i>Rhagodia sp.</i></p>
<b>Weeds</b>	<p><b>HIGH PRIORITY</b></p> <p><b>Marguerite Daisy (<i>Argyranthemum frutescens</i>)</b> Small patch of plants at Quarry South. Spot spray while numbers are low.</p> <p><b>Agave (<i>Agave americana</i>)</b> 20 large plants and hundreds of small ‘pup’ plants on the eastern side of the road, opposite The Quarry. A high threat of spread. Treatment is basal bark treatment for large plants and small plants to be manually removed.</p> <p><b>Soursob (<i>Oxalis pes-caprae</i>)</b> Soursob is prevalent throughout this area. Any areas designated for revegetation should be sprayed with selective herbicide.</p> <p><b>*African Boxthorn (<i>Lycium ferocissimum</i>)</b> (Native Australian Boxthorn is also present in this area). 10 -15 plants near the southern end of the dunes (near steps) at Berry Bay. Spot spray. 20-30 small boxthorn between Berry Bay and The Quarry. Small number of plants at Quarry South. Spot spray.</p> <p><b>*False Caper (<i>Euphorbia teracina</i>)</b> Heavy infestation between Mystos and Quarry North. Spray with follow up spot spraying.</p> <p><b>LOW PRIORITY (MONITOR)</b></p> <p>False Sow Thistle (<i>Reichardia tingitania</i>), Hare’s Tail Grass (<i>Lagurus ovatus</i>), Beach Daisy (<i>Arctotheca populifolia</i>) - Eradicated, Gazania (<i>Gazania sp.</i>) - Eradicated, Sea spurge (<i>Euphorbia paralias</i>)</p>

# 5

## SITE DESCRIPTIONS AND RECOMMENDATIONS

<b>Conservation significance</b>	<ul style="list-style-type: none"> <li>Coastal Action Plan Cell 74 and 75. Lowest conservation priority with a medium threat based on coastal cell analysis (Caton et al.2007)</li> <li>The following listed fauna have been recorded from the Berry Bay area: Sooty Oystercatcher (SA:R), Southern Right Whale (AUS:EN, SA:V), Ruddy Turnstone (SA:R), Hooded Plover (AUS:VU, SA:V), Lined Earless Dragon (YP:RA)</li> <li>Culturally significant sites acknowledged</li> </ul>
<b>Active Community Groups and projects</b>	<p>Formby Bay Environmental Action Group and Corny Point Progress Association.</p> <p>Both groups are revegetating and rehabilitating this area.</p>
<b>Summary of Site Recommendations</b>	<p>The natural landscape and view is highly valued along this stretch of coast. Due to low visitor numbers, infrastructure such as extra steps would impact negatively upon this coastline.</p> <p><b>Berry Bay South car park</b></p> <ul style="list-style-type: none"> <li>WTY Interpretive signage 'Rips and Currents' and 'Small Birds of Prey'</li> <li>Second compost toilet to manage busy periods (incorporated into existing facility)</li> <li>Revegetate degraded area just north of West Coast Road intersection with indigenous tubestock</li> <li>Review effectiveness of current warning signs for rips and currents</li> </ul> <p><b>Berry Bay North car park</b></p> <ul style="list-style-type: none"> <li>Current signage is very messy. Redesign current rips warnings to one sign</li> <li>Replace signage at West Beach Road entrance from 'Camping at approved sites' to 'Camping only permitted at Gravel Bay Bush Campground'</li> </ul> <p><b>Berry Bay sand dunes</b></p> <ul style="list-style-type: none"> <li>Beach Daisy to be monitored and hand pulled if present. Distribute information sheet on identification (available from Natural Resources Northern and Yorke) to Corny Point residents, and promote on website and social media</li> <li>Weed control and revegetation of sand dune next to South Berry steps (50 tubestock)</li> </ul> <p><b>Mysto's car park - Quarry North</b></p> <ul style="list-style-type: none"> <li>Close and rip track between Mysto's car park and Quarry North for revegetation</li> <li>Close northern entrance from Lighthouse Road into Quarry North leaving the southern entrance open</li> <li>Formalise Quarry North as an overflow car park for Mysto's surf break (8 - 10 cars)</li> <li>Control of annual weeds (predominately Soursob, False Caper and annual grasses) prior to planting 200 indigenous tubestock, as there is heavy weed infestation in this area</li> </ul>

**Quarry South – Round Rock**

- Close the track between The Quarry and Round Rock car park, ripping both ends up to the regenerated vegetation
- Establish 2 formalised camping sites and a turnaround space at the very southern end of the Quarry
- Camp signage to be placed directly before camping area
- Improve and formalise with gravel the track at Quarry South leading to camp sites
- Monitor track to beach at South Quarry for erosion
- Provide day visit car park for 2 - 3 cars at Quarry South entrance
- Protection of vegetation required on the eastern side of the track (medium rocks and signage)
- Spot spray small amount of African Boxthorn and Marguerite Daisy
- Removal of Agave plants adjacent to The Quarry
- Gully erosion occurring approximately 100 metres north of Round Rock. Place a coir log/soil to slow water movement and plant 50 indigenous tubestock
- Formalise Round Rock car park with gravel and border with small rocks
- WTY Interpretive sign on the geology of Round Rock/Berry Bay area at car park

**Berry Bay North car park**

*Multiple signs at beach entrance*
