# YORKE PENINSULA ECONOMIC DEVELOPMENT AND TOURISM STRATEGY 2022 - 2026

DICIUS IN

### ACKNOWLEDGEMENT OF COUNTRY

Yorke Peninsula Council acknowledges the Narungga (traditionally spelt Nharangga) people, the traditional owners of the Country and pay respect to their Elders past and present. We recognise and respect their cultural heritage, beliefs and relationship with the Country. We acknowledge that they are of continuing importance to the Narungga people living here today.

### STRATEGIC CONTEXT AND SITUATION ANALYSIS

#### **The Yorke Peninsula**

Yorke Peninsula is between 1.5 to 3 hours' drive from Adelaide. This travel time will be reduced thanks to the completion of the Port Wakefield **Overpass** and Duplication Project by late 2022. Its proximity to Adelaide provides Yorke Peninsula with opportunities in economic development, such as supply chain links and visitor flows. Additionally, the vast land area potentially accommodates the region's economic growth in the long term. However, the residential dispersal challenges the deliberate delivery of limited resources for economic development across the region.

Other advantages of Yorke Peninsula include:

- An abundance of natural resources: Yorke Peninsula is home to one national park, a beautiful coastline, and a wide range of flora and fauna species in addition to salt lakes, stunning sunset and numerous Instagrammable spots from endless golden fields.
- Environmental conservation projects including the Windara Reef and the Marna Banggara projects are potential resources for eco-tourism activities.
- A relaxed and traditional country lifestyle.
- A rich culture and history embodied in museums, mural trails, heritage buildings, lighthouses, and shipwrecks.
- The historical and current cultural values from the Narungga community.

#### **Community profile**

Yorke Peninsula is home to 11,331 people. The proudest community characteristic of Yorke Peninsula is the relatively high volunteering rate. This is a significant tailwind factor for the successful economic initiatives in the region and the "local focus" identified in this Strategy

However, the ageing population and lack of a skilled workforce are community characteristics that may affect economic growth.

In the Regional Voice 2020 conducted by Businesses SA, skill availability was ranked as the number one challenge by businesses in Yorke Peninsula, Mid-North and Port Pirie.

#### The local economy

Agriculture, Forestry and Fishing as well as Tourism are the economic backbones of Yorke Peninsula. These two industries drive the growth of other sectors, including business services industries (such as professional, administrative, financial and insurance services) and population services industries (such as healthcare, real estate, education, construction).

A common characteristic of these two industries is their vulnerability to the natural environment and the uncertainties such as severe weather and crisis events. The strong reliance on agriculture, forestry and fishing results in a skewed economy of Yorke Peninsula. This means that the potential of high-valued and labour-intensive industries such as accommodation, food, retail, education and training, health and wellness, and creativity is not yet optimised.

#### The tourism industry

The tourism industry is not just about accommodation and food and dining. Any industries where the product providers are in direct contact with visitors are classified as tourism-related industries. For instance, a supermarket, a fuel station, in addition to a caravan park and a cafeteria all serve visitors and benefit from a visit of travellers.

The tourism satellite account standard statistical а framework set within the context of the whole economy - is developed as the main tool for the economic measurement of tourism so that tourism's contribution to the economy can be determined be and can compared with other industries. Based on this framework, the tourism industry of Yorke Peninsula in 2018-19 was estimated to be the second most job generated industry in the municipality (after Agriculture, Forestry and Fishing).

visitor nights

visitor spend

<sup>&</sup>lt;sup>11</sup> Tourism Research Australia - National Visitor Survey and International Visitor Survey and Regional Expenditure database. Daytrip and international visitor data were smoothed over a four-year average. Domestic overnight visitor data were unsmoothed.

<sup>&</sup>lt;sup>12</sup> As the tourism economic data for Yorke Peninsula (LGA) are not available, an estimate alternative was used by using the visitor spend of Yorke Peninsula (LGA) benchmarked against the tourism economic values of Yorke Peninsula (tourism region) in 2018-19 published by Tourism Research Australia.

#### Current challenges for the

visitor economy of Yorke Peninsula include:

- Low spend per night of domestic overnight visitors
- Seasonality: 35% of visits by domestic overnight visitors occur during summer, whereas only 18% of the visitations from this segment were in winter.
- Poor linkage of local produce and tourism: contradicting the rich agriculture and seafood of Yorke resources Peninsula. the region's local produce is not recognised tourists' at touchpoints.

# Top 10 south australian's LGAS by domestic overnight visitor nights in $2020^{11}\,$

- **Supply shortage**: limited food/drink options, lack of high-end accommodation result in potential economic loss from this supply shortage, particularly in addressing travel needs of shack owners, visitors visiting friends or relatives, and affluent travellers. Additionally, scarce corporate function options across Yorke Peninsula hinder the region from attracting corporate events and business travellers. Furthermore, there is limited add-on experience for visitors of different travel purposes and local transport options. Due to limited tourism offerings, a high volume of visitations to Yorke Peninsula contradicts a modest contribution of these visitor flows to the local economy.
- Lack of packages and touring itineraries: the region is well recognised as a destination for self-drive trips. However, there are limited self-guided itineraries specifying things to do in a package with accommodation, eating and events to drive demand from the self-drive segment.
- **Business capacity pressure**: family-based businesses, micro- to small-scale enterprises, the seasonality and the staffing cost during weekends and public holidays exacerbate a pressure on tourism businesses on the Yorke Peninsula to maintain their service availability all-year-round for visitors.
- Limited business capability: many tourism businesses on Yorke Peninsula experience

limited know-how on digital communication channels, business plans, marketing and branding.

- Market development: the traditional markets of Yorke Peninsula are grey nomads in their caravanning trips and South Australian families with children on holiday trips. The region's exposure to international visitors, inter-state family travellers and young solo travellers is limited. Additionally, there are untapped niche markets such as travellers with disabilities, people with special food needs, and corporate events visitors.
- Limited understanding of the visitor economy and its values: the wider business community expresses a low appreciation of tourism dollars in the local economy and the significance of customer services.
- Place marketing and communication: visitors' understanding of Yorke Peninsula is limited and often associated with free or low-cost activities, a relaxable but occasionally sleepy destination. The destination's communication is limited and confusing.
- **Place branding**: there is a lack of a framework to harness current efforts and echo the identity of Yorke Peninsula.
- There is no mechanism of destination stewardship available for the tourism development of Yorke Peninsula.

#### **COVID-19 and its impact on the Yorke Peninsula economy**

COVID-19 urges a refreshment for the economy of different scales, in which transformative initiatives, responsible economic growth, climate change mitigation, and nature care are echoed. This glocal trend regulates how Yorke Peninsula shapes economic trajectories in general and the visitor economy in particular.

Among various efforts to better build back the economy after the pandemic, sustainable development terms such as decarbonised economy, regenerative economy, circular economy are explored. These concepts denote the green ecological economy based on low energy consumption and low pollution.

Regarding the visitor economy, the pandemic has re-shaped travel patterns, transformed customer behaviours, and re-defined what makes a travel experience. Among emerging market trends are the increasing interest of Australian travellers in their "backyard", exploring regional areas and supporting local businesses. Additionally, nature connection is the most prevailing travel trend in post-COVID-19. At the strategic planning level, the attributes of sustainability, resilience, and social license are increasingly practised. Thus, tourism recovery by boomerang back to the pre-COVID19 is ineffective. Instead, a new way of doing tourism and managing the destination is needed.

#### **Strategic alignments**

The development of this Strategy is aligned with the Yorke Peninsula Council's Strategic Management Plan (2021-2025) and is fitted into the regional and state legislative planning requirements, including:

- South Australian Regional Development Strategy
- South Australian Visitor Economy Sector Plan 2030
- South Australian Regional Visitor Strategy 2025
- Yorke Peninsula Tourism Action Plan

#### The principles of economic development

Yorke Peninsula is bordered by the sea on three sides with 485 kilometres of coastline. The two major industries of agriculture and tourism both rely on the natural environment and its health. In addition, the region is valued for its pristine nature. These features require coastal management and environmental conservation considerations, climate change adaptation initiatives, and efficient use of resources in economic activities.

Yorke Peninsula is characterised by its historical amalgamation from four different local government areas and the dispersal of 11,331 residents in 45 towns of various sizes across 5,899 square kilometres. Additionally, the region is home to the Narungga people. These characteristics suggest the need of monitoring social impact and community sentiment in parallel with the economic growth.

Small- and micro-sized businesses are acknowledged as a major driver of economic growth. Also, local workforce development is prioritised to assist new economic opportunities.

#### The Strategy

The Strategy provides a blueprint for Yorke Peninsula to be *economically prosperous*<sup>13</sup> in harmony with the liveability of the region and the health of the environment. Specifically, the Strategy maps out frameworks and direction for the economic development and the visitor economy of Yorke Peninsula in the next five years. The Strategy identifies enablers of the growth, related pathways, actions of implementation and expected outcomes.

An interpretation of the term *economically prosperous* is as follow:

- *The economically prosperous Peninsula* is defined by its diverse and productive economy.
- The economically prosperous Peninsula is driven by proactive businesses capable of participating in digital transformation, embracing new growth opportunities, adapting to disruptions and excelling at sustainability practices.
- *The economically prosperous Peninsula* successfully contributes to shaping the place's identity.
- *The economically prosperous Peninsula* successfully contributes to improving the liveability of the region.
- *The economically prosperous Peninsula* ensures the continued responsible use of scarce resources and the effective practices of environmental conservation.

<sup>&</sup>lt;sup>13</sup> The phrase is sourced from the Yorke Peninsula Council's Strategic Management Plan 2021-2025.

• *The economically prosperous Peninsula* is governed through co-design and co-effort practices in building a better climate for the thriving and development of all involved.

# **PRIORITIES AND PATHWAYS 2022-2026**

#### **Economic diversification**

#### Rationale

A priority on economic diversification is to address the challenges of the skewed economy and the poor linkage of local produce and tourism. Economic diversification can drive jobs, promote healthier growth for the local economy, and encourage market agility for businesses.

#### **Strategies**

- 1. Promote value-adding opportunities for agribusinesses.
- 2. Support the linkages of food and local produce to local markets and tourists.
- 3. Encourage economic opportunities from creative, recreational and wellness activities.
- 4. Advocate for the potential and showcase of Yorke Peninsula in the sustainable energy sector.

#### Links to the Strategic Management Plan 2021-2025

**Strategy 1.6.** Identify opportunities to advocate on behalf of key industries (e.g., agriculture, tourism etc.).

Strategy 1.9. Seek out, develop and deliver on economic development opportunities.

#### **High-yielding tourism sector**

#### Rationale

A high-yielding tourism sector focuses on improving tourist experience and the effective delivery of tourism economic benefits to the local community rather than solely increasing market volumes. A high-yielding tourism sector is aimed to deliver the following objectives:

- Address the significant issues of the Yorke Peninsula tourism sector: visitors' low spend per night, seasonality, limited visitor experience, supply shortage, lack of packages and touring itineraries.
- Transform the tourism industry from offering services into delivering experiences.
- Contribute to developing the destination branding.
- Direct the industry growth towards achieving sustainable tourism development goals.

#### Strategies

1. Diversify targeted markets using demographic, geographic and psychographic baselines.

- 2. Support the diversification of local-driven and authentic experience.
- 3. Advocate for the experience development on the baseline of natural beauty, wildlife conservation, rich agriculture and seafood, Aboriginal resources, creative and art activities, and local produce.
- 4. Improve the market-readiness of visitor experience through packaging and itineraries.

#### Links to the Strategic Management Plan 2021-2025

**Strategy 1.3.** Improve visitor experiences, including tourism infrastructure, signage, information and support.

**Strategy 1.5.** Partner with and build positive relationships with key stakeholders to progress tourism and business growth.

**Strategy 1.6.** Identify opportunities to advocate on behalf of key industries (e.g. agriculture, tourism etc.).

**Strategy 1.7.** Explore opportunities for 'missing or sub-standard' infrastructure (e.g. freight movement, function centre, large accommodation etc.).

Strategy 1.9. Seek out, develop and deliver on economic development opportunities.

#### **Yorke Peninsula promotion**

#### Rationale

Promotion and marketing are prioritised to mitigate the communication-related issues: low awareness and misleading perception among visitors, low recognition of tourism dollars and customer services among the wider business community, limited understanding of tourism offerings among tourist providers, and intra-region rivalry.

Promotion and marketing help optimise visitor expenditure outcomes, refresh the destination image and contribute to the place's branding.

#### Strategies

- 1. Improve the effectiveness of digital communication channels.
- 2. Facilitate awareness-raising campaigns to promote the roles of businesses in the community development, advocate for the values of the visitor economy, and encourage younger generations of business leaders.
- 3. Encourage drawcard events for the community's recreation and visitor attractions.
- 4. Facilitate a blueprint to guide industry growth, placemaking and tourism activities to celebrate the Yorke Peninsula identity.

#### *Links to the Strategic Management Plan 2021-2025*

**Strategy 1.3.** Improve visitor experiences, including tourism infrastructure, signage, **information** and support.

#### Strategy 1.4. Support local events and help attract new events.

#### **Business development**

#### Rationale

An overhauling of business support is to improve the perceived red tape among businesses and enhance businesses' capacity and capability. Strategic interventions under this theme can facilitate the thriving and supportive business community and position the region as a businessfriendly place for investments.

#### **Strategies**

- 1. Improve the business-friendly environment for potential and existing businesses.
- 2. Leverage the varied delivery of business resources.
- 3. Offer business support that contributes to generating greater economic impacts for the region.

#### *Links to the Strategic Management Plan 2021-2025*

Strategy 1.1. Provide an easier, streamlined development approval application process.

**Strategy 1.5.** Partner with and build positive relationships with key stakeholders to progress tourism and business growth.

Strategy 1.8. Efficient delivery of permits, leases and licences.

Strategy 1.9. Seek out, develop and deliver on economic development opportunities.

#### Infrastructure development

#### Rationale

Strategies and actions under this theme enable the guideline for endeavours and resource allocation to tackle the challenges of limited economic and tourism infrastructure, poor telecommunication network, and less attractive mainstreets in towns. An upgraded, quality and efficient infrastructure is crucial to accommodating new economic opportunities, increasing the region's liveability and enhancing the region's positioning as a place of choice to visit, live, and work.

#### **Strategies**

- 1. Advocate reforms and improved effectiveness of the legislative infrastructure.
- 2. Facilitate initiatives to upgrade the local and water transport, and digital and telecommunication infrastructure of the region.
- 3. Improve trail networks and public facilities for the recreation of residents and visitor attractions.

4. Ensure the infrastructure sustainably accommodates the economic growth, delivers community well-being, and enhances visitor experience; while adopting a lifecycle cost, co-design, inclusiveness, resilience, and environment-conscious approach.

#### Links to the Strategic Management Plan 2021-2025

Strategy 1.2. Deliver strategic and responsible land use planning.

**Strategy 1.3.** Improve visitor experiences, including tourism infrastructure, signage, information and support.

**Strategy 1.7.** Explore opportunities for 'missing or sub-standard' infrastructure (e.g. freight movement, function centre, large accommodation, etc.).

#### Skilled workforce development

#### Rationale

Skilled workforce development encompasses improving the local workforce's skills and capability and, in parallel, provides the region with the skilled workforce for economic transformation.

#### **Strategies**

- 1. Liaise programs on school-to-employment pathways and youth employment schemes to increase the skilled employment pool of the region.
- 2. Facilitate initiatives that attract former residents to resettle on Yorke Peninsula.
- 3. Advocate regional migration programs of skilled professionals and business investment.
- 4. Develop re-skill and upskills programs for the local workforce.

#### *Links to the Strategic Management Plan 2021-2025*

**Strategy 1.5.** Partner and build positive relationships with key stakeholders to progress tourism and business growth.

#### **Investment attraction**

#### Rationale

A focus on investment attractions is to improve the attractiveness of Yorke Peninsula to prospective investors and attract significant investments for the economic transformation.

#### Strategies

1. Update the region's investment opportunities in alignment with the economic and community development priorities.

2. Improve investment resources and support to strengthen the Yorke Peninsula's readiness for game-changing projects and enhance the region's positioning as a place of choice for investments.

#### Links to the Strategic Management Plan 2021-2025

**Strategy 1.1.** Provide an easier, streamlined development approval application process.

**Strategy 1.5.** Partner with and build positive relationships with key stakeholders to progress tourism and business growth.

**Strategy 1.7.** Explore opportunities for 'missing or sub-standard' infrastructure (e.g. freight movement, function centre, large accommodation etc.).

Strategy 1.9. Seek out, develop and deliver on economic development opportunities.

#### Innovation, resilience and sustainability

#### Rationale

Within the current context, which is strongly regulated by uncertainties and disruptions, innovation, resilience and sustainability practices are essential features for businesses and the economy. Therefore, strategic guidelines on this area of priority can help to improve the industry productivity, enhance business capacity to capture unprecedented opportunities, enable business readiness to change, and improve the sustainable development of the region's economy.

#### Strategies

- 1. Advocate for the active participation of business in digital transformation and knowledge sharing on business innovation.
- 2. Encourage the efficient use of land, water and energy resources and inclusive and regenerative practices in economic activities.
- 3. Activate a mechanism of destination stewardship and visitor management.
- 4. Facilitate practical works to improve business resilience and enhance the adaptability of the local economy to changes and reforms.

#### Linka to Strategic Management Plan 2021-2025

**Strategy 1.5.** Partner with and build positive relationships with key stakeholders to progress tourism and business growth.

**Strategy 1.9.** Improve visitor experiences, including tourism infrastructure, signage, information and support.

# **ACTION PLAN 2022-2026**

#### **Overview**

#### Resourcing

The deployment of resources is essential while scheduling the action plan. The execution of planned activities and within their timeframe is subject to the availability of resources. Two sorts of resources are identified, i.e., staffing resources and financial resources.

Against the staffing resources, the priority of actions is classified as follow:

| High   | Due to their enduring impacts, these actions are prioritised in the plan's implementation.  |
|--------|---|
| Medium | Impacts from these actions are desirable but implementation of these actions requires extra resources.  |
| Low    | Impacts from actions are ideal for the local economy in the long run.<br>However, implementation of these action requires extra resources with<br>high efforts. |

Financial resources usually mean cash flows need to proceed actions. Internally, the financial resource for economic development is allocated from the annual capital budget. Externally, financial resources are often sourced from governmental grants and co-investment schemes and funding programs from community, not-for-profit and developmental agencies. The identification of financial resourcing ranges is proposed:

| Νο     | Action can be delivered with existing financial resources allocated from the annual budget                |
|--------|---|
| Low    | Under \$50,000  |
| Medium | \$50,000 - \$100,000  |
| High   | Over \$100,000  |
| Varied | Cost estimate is varied, dependent on factors such as the level of engagements and the scope of projects. |

#### Timeframe

The Action Plan outlines actions based on two kinds of time schedules, i.e., ongoing activities and project-based activities. The difference between these two timeframes is that ongoing activities will form part of the Council's engagements, whereas project-based actions are estimated to occur in a limited duration.

When the planned activities will be in place, and for how long, is scheduled under the condition that the required resourcing is provided. The lack of resources needed and/or a delay in resourcing processes will affect the planned actions' timeframe.

Some actions are temporal sequencing. This means a lack of resources to carry out a particular action may affect the schedule of other actions.

As the timeframe is scanned up to 4 years and beyond, the detailed level of action planning is balanced to accommodate contextual changes in between.

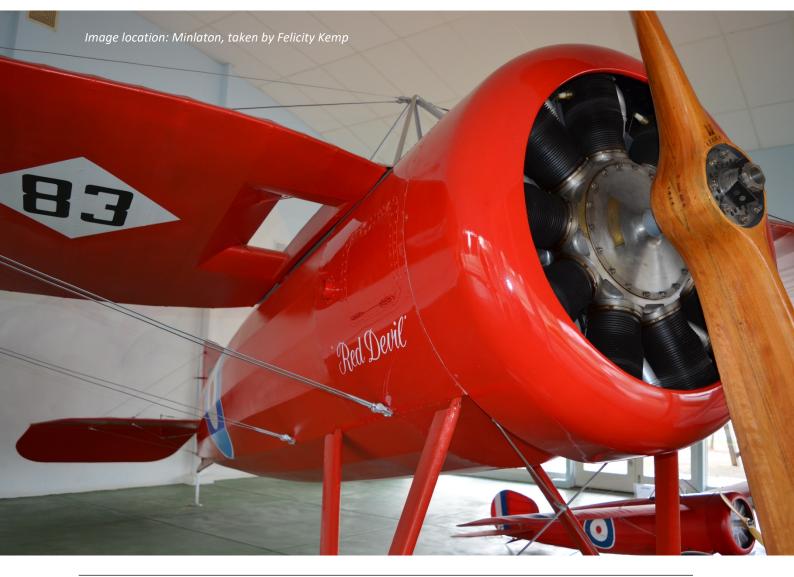

#### The Council's role

The Council's role in the Action Plan is identified as followed:

| Direct    | The Council has a direct influence on the outcome  |
|-----------|--|
| Influence | The Council has an influence on the outcome, but other external factors impact it            |
| Monitor   | The Council has no influence on the outcome but will monitor it to assist in future planning |

#### **Evaluation**

Within this Action Plan, initiatives are grouped into different themes but are interconnected to achieve the desired outcomes. Thus, an evaluation of results should be flexibly viewed in a whole-plan approach rather than individual actions.

### Theme 1 - Economic diversification

|     | Action   | Stake         | holders                          | Priority | Timeline | Financial |

## **STRATEGY IMPLEMENTATION**

#### **Collaborations and partnerships for the Strategy's implementation**

#### **Objectives**

- Encourage the contributions of businesses leadership in local economic development.
- Build effective regional alliances of local governments to effectively respond to new economic and spatial imperatives and enhance the Yorke Peninsula branding visibility.
- Strengthen partnerships of Council and regional development agencies and destination management organisations to ensure efficiency and effectiveness of resources, knowledge and skills.
- Liaise with the state agencies and professional stakeholders to connect the region and optimise the sectoral intelligence and support.

#### *Links to the Strategic Management Plan 2021-2025*

**Strategy 1.5.** Partner with and build positive relationships with key stakeholders to progress tourism and business growth.

#### *Recommendations*

- Advocate for the establishment of business leadership organisations such as chambers of commerce or business associations representing the needs of Yorke Peninsula businesses and providing services for their members.
- Coordinate with neighbour Councils in promoting Yorke Peninsula, delivering visitor information services, and infrastructure development.
- Continue funding agreement and provide support to YPT and RDAYMN to develop and implement their business plan priorities.
- Continue to work with the Legatus, Local Government Association of South Australia, SATC, and other Federal and State agencies to activate economic and tourism opportunities for Yorke Peninsula.

#### Governance

#### **Objectives**

- Ensure the relevance of the Strategy as a strategic planning baseline for economic and tourism development activities.
- Ensure transparency, particularly in relation to Council's owned businesses.
- Avoid "vanity projects" and "white elephants."

#### *Links to the Strategic Management Plan 2021-2025*

Strategy 5.2. Effective leadership and informed decision making.

#### Recommendations

- Establish a Yorke Peninsula Economic Advisory Board and maintain quarterly meetings to provide leadership on the implementation of the Strategy and to monitor the decision-making process in alignment with the interest of businesses, the desires of the community and strategic frameworks.
- Develop reporting tools (e.g., tourism market trends, business audit, economic performance indicators, and industry gap analysis) for improved decision making and make them available to Elected Members.
- Annual Economic Development reports communicated to Elected Members.
- Strategy and Action Plan Review after two years to ensure the trajectories and associated actions are current and to adapt to changes.

# Appendix 2 – Glossary

| Terms   | Definition  | Reference  |
|---|---|------------|
| Median age  | The age at which half the population is older, and half is younger.   | ABS        |
| abour force   | The total number of people who are willing and able to work, including everyone who is working or actively looking for work.  | ABS        |
| Participation<br>rate to the<br>abour force   | The percentage of the total population who are in the labour force.   | ABS        |
| ndex of Relative<br>Socio-Economic<br>Disadvantage<br>RSD (Socio-<br>Economic<br>ndexes for<br>Areas) | The IRSD summarises variables that indicate relative disadvantage. This Index ranks areas on a continuum from most disadvantaged to least disadvantaged. A low score on this Index indicates a high proportion of relatively disadvantaged people in an area. Across South Australia, the highest and lowest indexes by LGA are 1100 and 717, respectively. | ABS        |
| Dutput  | Consists of the value of goods and services<br>produced by using the ingredients of economic<br>activity, including land, labour, capital and<br>enterprise.  | ABS        |
| Gross Regional<br>Product   | A measure of the size or net wealth generated by a region, including the sum of all industries' gross product plus ownership of dwellings.  | economy.id |
| Gross Value<br>Added  | Measure showing the productivity of an industry sector.   | economy.id |
| /isitor economy   | includes those in the demand side who either<br>consume or desire services for stays of less than a<br>year (i.e. visitors) and those in the supply side who<br>either provide or promote any one of those<br>services (i.e. visitors' service providers).  | Austrade   |
| <b>/isitors</b>   | Can be domestic or international visitors, who are<br>travelling for one of five primary services, i.e.<br>Holiday; Visiting friends and relatives; Business;<br>Work (for international travellers only); and<br>Education (for international travellers only).  | Austrade   |
| Domestic<br>visitors  | Are Australians or residents who travel either for<br>one or more overnight stays at least 40 km from<br>home or a day trip longer than 4 hours and more<br>than 50 km from home.   | Austrade   |
| International<br>visitors   | Are non-residents who visit Australia for less than a year for any purpose.   | Austrade   |
| Visitors' service<br>providers  | Span across at least eight subsectors, i.e.<br>Accommodation; Aviation; Culture, arts and<br>recreation; Travel agency and information  | Austrade   |

|  | services; Education and training; Food services;<br>Retail; and Ground Transport.  |                                       |
|--|--|---------------------------------------|
| Visitor nights                               | Are the total number of nights spent in association with individual trips to a region  | TRA                                   |
| Daily visitors                               | Are calculated by aggregating the number of visitor nights and the number of day trips for a year, then divided by 365.  |                                       |
| Visitor spend                                | Money spent by, and on behalf of, travellers<br>during a trip. Expenditure items include airfares<br>and other transport costs such as bus and train<br>fares and amounts spent on trip-related items<br>before and after the trip.  | TRA                                   |
| Seasonality                                  | Indicates seasonal fluctuations in tourism volumes over the calendar year.   |                                       |
| Demography-<br>based market<br>segments      | Group travellers based on their age/ lifespan/<br>travel party. For example, young coupled, double<br>income travellers or solo travellers   |                                       |
| Geography-<br>based market<br>segments       | Group travellers based on their usual residence.<br>For example, intrastate, interstate and<br>international visitors  |                                       |
| Psychography-<br>based market<br>segments    | Group travellers based on their needs of fulfilment<br>through travel. For example, Rechargers,<br>Adventurers, Foodies, Festival and Event Goers.   |                                       |
| Destination<br>stewardship                   | Is a process by which local communities,<br>governmental agencies, NGOs, and the tourism<br>industry take a multi-stakeholder approach to<br>maintain the cultural, environmental, economic,<br>and aesthetic integrity of their country, region, or<br>town. In other words, to ensure that the<br>destination retains and enhances the distinctive<br>attributes that make it attractive to beneficial<br>tourism. | Global Sustainable<br>Tourism Council |
| Social license                               | refers to the ongoing acceptance of a company or<br>industry's standard business practices and<br>operating procedures by its employees,<br>stakeholders, and the general public.  | sociallicense.com                     |
| Sustainable<br>consumption<br>and production | Refers to the use of services and related products,<br>which respond to basic needs and bring a better<br>quality of life while minimizing the use of natural<br>resources and toxic materials as well as the<br>emissions of waste and pollutants over the life<br>cycle of the service or product so as not to<br>jeopardize the needs of future generations.  | UN Environmental<br>Programme         |

### Appendix 3 - Yorke Peninsula (LGA)'s visitor profile<sup>14</sup>

#### 63% domestic overnight visitors

VS 30.4% in regional South Australia **36.3% daytrip visitors** VS 68.6% in regional South Australia **0.7% international visitors** VS 1.1% in regional South Australia
