CONTRACTOR ENVIRONMENTAL RULES AND CONTROL MEASURES

Everybody has a legal responsibility to take all reasonable and practicable measures to minimise or prevent environmental harm.

Council implements Environmental Protection best practice management designed to comply with the State Environmental Protection laws and local Council by-laws. This will include erosion control, sediment control and barriers, street sweeping and stabilised entry, where practicable.

The Contractor shall ensure these practices are respected through due diligence, thoughtful work practices and proper clean up. These practices include awareness of community expectations in relation to noise and dust control, minimisation of sediment run-off through silt/debris collection and minimisation of soil disturbance and erosion from excavating and earth movement.

Sand and soil stockpiles shall be placed wholly on the construction site behind sediment barriers.

The Site Supervisor must approve removal of any such barriers. Soil/sediment build-up in or near gutters must be cleaned if there is a real or potential threat to the environment.

Concrete waste, household paint, oil, fuel, herbicides and pesticides must not be allowed to wash into gutters.

The Contractor must ensure immediate clean-up if this occurs.

Entry and exit to work site should be by stabilised area

Any stabilised site access must not be altered without the Site Supervisor's approval.

During the provision of *Services* the Contractor will not place any material that is *reasonably expected to move* in a position on the site that has the "potential" of eroding or washing away.

The Contractor shall clean-up any *real or potential* environmental problem at the end of the day and before a rain event. Refuse must be placed in the designated containment area before the Contractor leaves each day.

Breach of these Site Environmental Protection and Control Measures constitutes a breach of the Contractor's Agreement with Council.
